SUBJECT INDEX

Acenaphthylene, study of the temperature dependence of the copolymerization constants for stilbene with styrene and - 1, 136

Acetate group content, the influence of molecular mass, - and synthesis method on the structuring of polyvinyl alcohol (PVA) in aqueous solutions 6, 1344

Acetic acid, structure of concentrated solutions of cellulose triacetate in methylene-chloride and - 5, 1082

Acetyl derivatives, on the problem of link diversity in polymers of - of ferrocene 4, 873

Acetyldiphenylyl-*o*-carborane, the synthesis and study of polyphenylene-type polymers based on the ethylketals of diacetylarylenes and - 7, 1612

Acid complexes, influence of - of metals of the first transitional series on the polymerization of styrene 10, 2382

Acoustic methods, a study of relaxational properties of concentrated polymer solutions by - 8, 2081

Acridinium cation, fluorescence quenching by bromide ions of the - in polyvinyl alcohol films 8, 1915

Acrolein, spectroscopic determination of the composition of bisulphite derivatives of copolymers of - with acrylic acid 7, 1842

Acrylamide, the solid-phase high-pressure polymerization of - initiated by shear strain 8, 1991

Acrylates, study of molecular distributions in linear oligoester - using oligo(diethyleneglycol adipate) dimethacrylates 7, 1771

Acrylic acid, determining the amount of crosslinking agent-N,N′-methylenediacrylamide in crosslinked copolymers of diethyl ester of vinylphosphonic acid with - 10, 2580

Acrylic acid, initiation of the polymerization of - and sodium acrylate by the hydrogen peroxide–ascorbic acid redox system 11, 2622

Acrylic acid, spectroscopic determination of the composition of bisulphite derivatives of copolymers of acrolein with - 7, 1842

Acrylic esters, interaction of homo- and copolymers of vinyl chloride and - with ozone 7, 1708

Acrylonitrile, study of the properties of dilute solutions of terpolymers of styrene with - and methyl methacrylate 3, 657

Acrylonitrile, the phase equilibrium and rheological properties of solutions of the copolymer of - with methyl methacrylate and vinyl sulphonate in binary solvents 8, 1977

Acrylonitrile polymerization initiator systems based on tris-π-allylchromium 8, 1922

Activation routes of ethylene polymerization by homogeneous catalysts based on titanium cyclopentadienyl complexes 9, 2162

Activators, role of the functionality of - during isothermal crystallization accompanying the activated anionic polymerization of ε-caprolactam 6, 1485

Adhesive compounds, strength and type of breakdown of - for polyolefins with metal and glass 3, 746

Adsorption and structure properties of the material of crazes in glassy polyethylene terephthalate 6, 1350

Adsorption of blood plasma proteins on a hydrophobic polymer surface dependent on hydrodynamic conditions **5, 1272**
Adsorption, effect of solvents on the of oligomers by silica gel **7, 1820**
Adsorption, effect of temperature, solvent composition and pressure on the - and chromatography of polystyrenes on macroporous glasses **2, 304**
Adsorption, study of - of polymer mixtures from solutions in a common solvent on a solid surface **11, 2641**
Adsorption-active media, an investigation of the connection between micro-crazing and the mechanical behaviour of glassy polyethyleneterephthalate during deformation in - **5, 1089**
Adsorption-active media, features of the structural-mechanical behaviour of glassy polyethyleneterephthalate under strain in - over a wide range of drawing rates **4, 959**
Adsorption-active medium, a model for the large reversible strain in a glassy polymer after deformation in an - **3, 633**
Adsorption-active medium, influence of crystallization on the structure and adsorption properties of glassy polyethylene terephthalate strained in an - **5, 1178**
Adsorption-desorption dynamics, the - for macromolecules at the liquid-solid phase boundary **2, 330**
Adsorption-promoting media, features of cold-drawing polymers in two-component - **5, 1146**
Adsorption-promoting media, the adsorption properties of polyvinyl chloride (PVC), polycapramide (PCA) and polyvinyl alcohol (PVAL) deformed in - **4, 902**
Adsorption properties, influence of crystallization on the structure and - of glassy polyethylene terephthalate strained in an adsorption-active medium **5, 1178**
Adsorption properties, the - of polyvinyl chloride (PVC), polycapramide (PCA) and polyvinyl alcohol (PVAL) deformed in adsorption-promoting media **4, 902**
Adsorption theory, the - of regular block-copolymers at the boundary between phases **2, 338**
Aerosil filler surface, features of styrene polymerization initiated by peroxide initiators grafted on the - **9, 2248**
Ageing, an IR-spectroscopic study of the thermo-oxidative - of certain butadiene–styrene copolymers **4, 807**
Alcoholic matrix, chain transfer during the low-temperature polymerization of vinyl monomers at the glass transition of an - **5, 1210**
Alcohols, features of radical polymerization in - of vinylpyridinium salts, varying the hydrophilic/probic balance **4, 947**
Alcohols, study of the structure and properties of polymers of vinylacety lene - **12, 2986**
Aliphatic bis-maleimides, the migrational melt copolymerization of anilinefluorene with some - **8, 1935**
Aliphatic copolyamides, ^{13}C NMR investigation of the structure of - **7, 1659**
Aliphatic diisocyanates, the properties of polyisocyanurates produced by the polycyclotrimerization of aromatic with - **6, 1381**
Aliphatic polyamides, photo-oxidation of - by the action of long-wave UV light **12, 3000**
Alkaline alcoholysis, on the role of solvents in the - of polyvinyl acetate **8, 1944**
tris-π-Allychromium, acrylonitrile polymerization initiator systems based on - **8, 1922**
Alternating copolymerization, factors affecting the molecular weight in the - of butadiene with propylene over the $TiCl_4$–$CH_3COC_6H_5$–$Al(iso\text{-}C_4H_9)_3$ catalyst system **10, 2426**
Alternating copolymerization, the donor type and its effect on the - of butadiene with propylene over the $TiCl_4$–$Al(iso\text{-}C_4H_9)_3$ catalyst system **10, 2418**

Amic acid, the line between the mechanical properties produced by thermal imidization of poly-(*p,p'*-diphenylenoxy)-pyromellitic - and the reaction conditions 4, 915
Amide catalysts, the mechanism of - of the reaction of the formation of polyimides 10, 2358
Amorphous bulk polymers, techniques of revealing supermolecular structures of - 8, 2037
Amorphous polymers, possibility of investigating the dynamic mechanical properties of crystalline polymers in the melting region in admixture with - 7, 1848
Amorphous regions, antiplasticization effect and the state of - of polycaproamide 5, 1301
Amorphous regions, thermal effects and variation of the density of - by elastic stressing of oriented polyethylene of different molecular weights 6, 1529
Analysis of mechanisms of rotational motion of polybutadiene macromolecules 4, 976
Analysis of the ^{19}F NMR spectra of copolymers of vinylidene fluoride with tetrafluoroethylene, and of vinylidene fluoride with tetrafluoroethylene and hexafluoropropylene. The use of an empirical additive scheme and of the principle of alternation 3, 711
Analysis, principles of - of binary copolymerization of "special" system of the first type 2, 523
Analysis, study of molecular motion in chloroprene rubber by nuclear quadrupole resonance, radiothermoluminescence and dynamic mechanical - using a torsion pendulum 8, 1985
Aniline, kinetics and mechanism of copolymerization of phenylglycidyl ether with ε-caprolactone by the action of - 2, 495
Anilinefluorene, the migrational melt copolymerization of - with some aliphatic bismaleimides 8, 1935
Anionic adiabatic polymerization, effect of conditions of synthesis on kinetics of structure-formation of polycaproamide during - 10, 2545
Anionic copolymerization kinetics, the - of ε-caprolactam with ω-dodecalactam 12, 2902
Anionic polymerization, rheokinetics of - of caprolactam 6, 1471
Anionic polymerization, role of the functionality of activators during isothermal crystallization accompanying the activated - of ε-caprolactam 6, 1485
Anisotropy of mechanical relaxation in monotextured polyethylene specimens 4, 991
Anisotropy, the optical - and the rigidity equilibrium of polyamidobenzimidazole molecules in sulphuric acid 11, 2722
9, 10-Anthraquinodimethane, IR and electronic spectroscopic study of the structure and polymerization of - 12, 2933
Antioxidant, oxidation of polyethylene stabilized by a strong phenolic - 1, 203
Anti-oxidants, mixtures of metal dithiocarbamates with amine- or phenyl-type - as oxidative degradation inhibitors for polyisoprene 9, 2157
Antiplasticization effect and the state of amorphous regions of polycaproamide 5, 1301
Aqueous solutions, a study of intermolecular interaction in - of polymers and cationic surfactants by polarized luminescence 6, 1356
Aqueous solutions, effect of ionic strength and pH of the medium on the behaviour of complexes formed by bovine serum albumin with poly-4-vinyl-N-ethylpyridinium bromide in - 2, 280
Aqueous solutions, separation of phases in - of polyethylene glycol and dextrane 6, 1330
Aqueous solutions, the influence of molecular mass, acetate group content and synthesis method on the structuring of polyvinyl alcohol (PVA) in - 6, 1344
Aromatic amines, thermal and thermal oxidative degradation of crosslinked polymers based on epoxides and - 12, 3040
***m*-Aromatic copolyamide molecules,** the flow birefringence and rigidity equilibrium of p- and - 12, 2908

p-Aromatic copolyamide molecules, the flow birefringence and rigidity equilibrium of *m*- and - molecules 12, 2908
Aromatic copolyamides, flow birefringence and rigidity of molecules of - of *para*-structure 10, 2375
Aromatic diisocyanates, the proeperties of polyisocyanurates produced by the polycyclotrimerization of aliphatic with - 6, 1381
Aromatic hydrocarbons, effect of - on the process of catalytic decopolymerization of polyisobutylene 12, 2875
Aromatic polyamides, the special role of solvents in some systems based on - 9, 2278
Aromatic polyethers containing norbornane type fragments 10, 2514
Arylcyanates, the polycyclotrimerization of - over $ZnCl_2$ 7, 1647
Arylethylmethyldimethylpolysiloxanes 5, 1154
Association in dilute solutions of polyblock copolymers based on polydimethylsiloxane and polyarylates 2, 401
Atom–atom potentials method, machine calculations for polyaryleneimide chain conformations and packing in the crystalline zones; the combination of the - with X-ray structural analysis 10, 2404
Autoionization mechanism of the rupture of chemical bonds in macromolecules 3, 741

Benzene, diffusion of - toluene and styrene in polyvinyl-chloride films 8, 2006
Bioresistant polymers, systhesis of - and block copolymers using initiating systems based on mixed metalorganic compounds of mercury, tin and lead 3, 643
Birefringence, dynamic - of solutions of flexible-chain polymers 7, 1778
Birefringence, molecular characteristics of highly-substituted cellulose nitrate in solutions from forward diffusion, flow - and viscometry 11, 2661
Birefringence of dilute solutions of an incompatible polymer mixture 2, 511
Birefringence, the flow - and rigidity equilibrium of *p*- and *m*-aromatic copolyamide molecules 12, 2908
Block copolymer solutions, a light-scattering study of butadiene–styrene - 7, 1626
Block copolymers, NMR investigation of the molecular mobility and structure of polysulphone–polybutadiene and polysulphone–polyethylene oxide - 10, 2474
Block copolymers, synthesis of bioresistant polymers and - using initiating systems based on mixed metalorganic compounds of mercury, tin and lead 3, 643
Block-copolymers, the adsorption theory of regular - at the boundary between phases 2, 338
Block copolymers, the reversed gas-chromatographic study of the domain structure formed by polyarylate-polydimethyl-siloxane - 2, 366
Blood plasma proteins, adsorption of - on a hydrophobic polymer surface dependent on hydrodynamic conditions 5, 1272
Bonds, effect of molecular interactions and molecular mobility on kinetics of breakdown of chemical - in a polymer 7, 1788
Bonds, localization of crosslinking - in irradiated polyethylene 12, 2957
Boundary between phases, the adsorption theory of regular block-copolymers at the - 2, 338
Boundary layer, the nature of the - between polyvinylchloride and a filler surface 1, 41
Boundary layer, thermal conductivity study of the - in filled polyvinyl chloride (PVC) and polyvinyl butyral (PVB) 7, 1652
Bovine serum albumin, effect of ionic strength and pH of the medium on the behaviour of complexes formed by - with poly-4-vinyl-N-ethylpyridinium bromide in aqueous solutions 2, 280

Bovine serum albumin, soluble complexes of - with poly-4-vinyl-pyridinium cations containing *N*-cetyl side radicals 2, 287
Bovine serum albumin, soluble ternary complex of poly-4-vinylpyridine, - and copper 2, 299
Bovine serum albumin, study of the structure of water-soluble complexes of - with poly-4-vinyl-N-ethylpyridiniu m bromide by light scattering 6, 1512
Branched polymers, on the structure of - of diallyl esters 8, 1965
Branched radical polymerization, kinetics of the variation of molecular weight distribution in - and its relation with processes of side chain formation 12, 3009
Branching, the influence of temperature conditions in the preparation of polyurethanes on - and properties of the polymers 11, 2737
Branching of oligomers, influence of the conditions of synthesis on the - synthesized by radical polymerization 10, 2460
Branching of polymers, rapid method for the evaluation of the degree of - 3, 803
Breakdown, effect of a phonon subsystem on the probability of polymer chain - 12, 2991
Breakdown, effect of molecular interactions and molecular mobility on kinetics of - of chemical bonds in a polymer 7, 1788
Breakdown, relaxation nature and regularities of - of crosslinked and non-cross linked polymers in the high-elastic state 6, 1554
Breakdown, strength and type of - of adhesive compounds for polyolefins with metal and glass 3, 746
Brittle and quasi-brittle states, fracture of polymers in - 4, 1011
Bromide ions, fluorescence quenching by - of the acridinium cation in polyvinyl alcohol films 8, 1915
Butadiene, factors affecting the molecular weight in the alternating copolymerization of - with propylene over the $TiCl_4$–$CH_3COC_6H_5$–$Al(iso\text{-}C_4H_9)_3$ catalyst system 10, 2426
Butadiene, kinetic parameters for the polymerization of - by certain titanium catalytic systems 1, 57
Butadiene, the donor type and its effect on the alternating copolymerization of - with propylene over the $TiCl_4$–$Al(iso\text{-}C_4H_9)_3$ catalyst system 10, 2418
Butadiene–methyl methacrylate copolymers, effect of an emulsifier on the microstructure of - 6, 1522
Butadiene-nitrile elastomers, on the high temperature relaxation transitions in - 12, 2941
Butadiene polymerization in the presence of butyl lithium modified with sodium butylate 1, 100
Butadiene–styrene copolymers, an IR-spectroscopic study of the thermo-oxidative ageing of certain - 4, 807
Butyl acrylate, study of the kinetic aspects of emulsion copolymerization of - with the methacrylic ester of α-hydroxyethyl-tert-butyl peroxide 10, 2396
Butyl lithium, butadiene polymerization in the presence of - modified with sodium butylate 1, 100

Calculation of regular macromolecular conformations of polyvinyl alcohol 7, 1760
Calculation of the surface energy of polymers from their refractometric and cohesive properties 4, 848
Calorimetric investigation of the polymerization of organobi- and organotricyclosiloxane 5, 1187
Calorimetric investigation, synthesis and - of oligosiloxane glycols and linear polyurethanes based on the latter 10, 2486

Caprolactam, rheokinetics of anion polymerization of - 6, 1471
ε-Caprolactam, role of the functionality of activators during isothermal crystallization accompanying the activated anionic polymerization of - 6, 1485
ε-Caprolactam, the anionic copolymerization kinetics of - with ω-dodecalactam 12, 2902
Caprolactam polymerizations, dodeca- and - catalyzed by *d*-metal oxides: TiO_2, ZrO_2 and ZnO 4, 907
ε-Caprolactone, kinetics and mechanics of copolymerization of phenylglycidyl ether with - by the action of aniline 2, 495
Carbochain polymers, the hydrodynamic properties of solutions of - containing the indazole ring 11, 2758
Carbon black, study of - distribution in polymers by the electron microscopy method 6, 1325
Carborane, low temperature transformations of polyarylates containing - 10, 2555
Carborane-containing compounds, influence of - on the oxidative stability of products of pyrolysis of network polymers 10, 2453
Carborane exocyclic vinylsilanes, homopolymerization of - and their copolymerization with methyl methacrylate 9, 2261
Carboranes, the structural changes in linear polyheteroarylene - during heat treatment 6, 1364
Cardic polymers, synthesis and investigation of metal-containing - 10, 2494
Carding diamines, copolymers synthesized from vinyl monomers and unsaturated oligo-imides of - 5, 1138
Catalysis of chain transfer and oligomer structure in radical polymerization of styrene in the presence of cobalt complexes of porphyrins 11, 2807
Catalyst, copolymerization of methyl methacrylate with ethylene in the presence of a VCl_4–(iso-C_4H_9)$_2$AlCl - 1, 246
Catalyst system, factors affecting the molecular weight in the alternating copolymerization of butadiene with propylene with the $TiCl_4$–$CH_3COC_6H_5$–Al(iso-C_4H_9)$_3$ - 10, 2426
Catalyst system, study of the mechanism of tetrahydrofuran homopolymerization with the - BF_3 + oxypropylene based on the MWD data 4, 889
Catalyst system, the donor type and its effect on the alternating copolymerization of butadiene with propylene over the $TiCl_4$–Al(iso-C_4H_9)$_3$ - 10, 2418
Catalyst system BF_3 + oxypropylene, study of the mechanism of tetrahydrofuran homopolymerization with the - based on the MWD data 4, 889
Catalyst system BF_3–propylene oxide, on the isomerization of propylene oxide during tetrahydrofuran polymerization by the - 12, 2964
Catalysts, activation routes of ethylene polymerization by homogeneous - based on titanium cyclopentadienyl complexes 9, 2162
Catalysts, metal-organic Ti–Al complexes containing phenoxy ligands as - of ethylene polymerization 11, 2766
Catalytic activity of a polyurethane–tin dibutyl dilaurate system in the synthesis of three-dimensional crosslinked elastomers 3, 763
Catalytic depolymerization, effect of aromatic hydrocarbons on the process of - of polyisobutylene 12, 2875
Catalytic polycondensation of organosilazanes 6, 1429
Catalytic system, molecular weight distribution analysis during polymerization of 3-methyl-3-chloro-methyloxetane with the - Al(iso-C_4H_9)$_3$–H_2O 1, 70
Catalytic systems, mechanisms of oxirane copolymerization with thiirane over diethyl zinc-based - 10, 2410

Cationic polymerization, kinetics and mechanism of - of epichlorhydrin in the presence of sulphuric acid 4, 1035
Cationic surfactants, a study of intermolecular interaction in aqueous solutions of polymers and - by polarized luminescence 6, 1356
Cellulose, conformation of the isolated helix of - 10, 2333
Cellulose, study of the grafting of methyl acrylate to (ethylene oxy) - 10, 2342
Cellulose, thermal, acid-hydrolytic and enzymatic degradation of - 1, 1
Cellulose diacetate, effect of the type of solvent on properties of graft copolymer solutions of - with polystyrene and their mixtures 3, 756
Cellulose nitrate, investigation of the structure and thermodynamic parameters of interaction of components in plasticized - 6, 1452
Cellulose nitrate, molecular characteristics of highly-substituted - in solutions from forward diffusion, flow birefringence and viscometry 11, 2661
Cellulose nitrate solutions, the hydrodynamic, electron-optical and molecular characteristics of - 6, 1389
Cellulose nitrates, IR-spectral study of the hydration of - 7, 1639
Cellulose nitrates, study of - by NMR ^{13}C spectroscopy 2, 460
Cellulose triacetate, structure of concentrated solutions of - in methylenechloride and acetic acid 5, 1082
***N*-Cetyl side radicals,** soluble complexes of bovine serum albumin with poly-4-vinylpyridinium cations containing - 2, 287
Chain propagation mechanism, kinetic study of the - in the alternating copolymerization of styrene with methyl methacrylate over diethyl aluminium chloride 9, 2174
Chain transfer, catalysis of - and oligomer structure in radical polymerization of styrene in the presence of cobalt complexes of porphyrins 11, 2807
Chain transfer, determination of the dependence of the - constant on the degree of polymerization by analysis of molecular weight distributions 5, 1169
Chain transfer during the low-temperature polymerization of vinyl monomers at the glass transition of an alcoholic matrix 5, 1210
Chain transfer agents, emulsion polymerization of monomers— - 9, 2222
Chain transfer reaction, features of the - in the polymerization of tetrafluoroethylene in organic media 11, 2776
Chain transfer reaction, kinetic study of catalysis of the - to monomer in the radical polymerization of methyl methacrylate 5, 1158
Charge carriers, optical generation of - in polytolane and its complexes with 2,4,7-trinitrofluorenone 1, 232
Charge transfer complexes and dipole–dipole association in polyvinylpyridinium salts 1, 224
Chemical bond formation between poly-1,1,2-trichlorobuta-1,3-diene and polystyrene by the Friedel–Crafts reaction 5, 1116
Chemical bonds, autoionization mechanism of the rupture of - in macromolecules 3, 741
Chemical equilibrium, concerning the two types of - in reactions between polyelectrolytes 12, 2881
Chemical structure, correlations between the - and the thermal stability of polyvinylchloride. A review 3, 535
Chemical structure, on the influence of the - of polymers on their thermal stability 9, 2194
Chemical structure, relationship between the - and thermal stability of emulsion PVC 5, 1204
Chemical structure, the - and glass transition temperatures of polyarimides 2, 409
Chemical transformations, balance of physico-chemical and - in solutions of polyamic acids on storage 6, 1406

Chemicomechanical degradation, role of physical impairment of a polymeric medium during - of triacetylcellulose 2, 431
Chitosan, study of rheological properties of dilute and moderately concentrated solutions of - 6, 1546
Chitosan solutions, on the viscosity properties of - 3, 665
Cholesteric type of liquid-crystalline copolymers 4, 1029
Chromatography, effect of temperature, solvent composition and pressure on the adsorption and - of polystyrenes on macroporous glasses 2, 304
Chromatography, micro-column exclusion - of polymers 1, 263
Chromatography, qualitative and quantitative analysis of random copolymers and homopolymer blends by pyrolytic gas - 11, 2696
Cobalt complexes, catalysis of chain transfer and oligomer structure in radical polymerization of styrene in the presence of - of porphyrins 11, 2807
Compatibility, on the - of polyfluoroethylenes 1, 149
Complex formation between polyazine with a system of conjugated multiple bonds and molecular bromine 5, 1233
Complex formation, investigation of - between soluble carboxymethyl ethers of polysaccharides and proteins 8, 1999
Complex formation, special features of - in the system Co^{2+}–polyethyleneimine 2, 270
Complex-formation, study of - between polyethylene glycols and transition metal halides 1, 238
Complexes, effect of the ionic strength and pH of the medium on the behaviour of - formed by bovine serum albumin with poly-4-vinyl-N-ethylpyridinium bromide in aqueous solutions 2, 280
Complexing of Na^+ ions with polyethylene glycol 7, 1827
Composition, spectroscopic determination of the - of bisulphite derivatives of copolymers of acrolein with acrylic acid 7, 1842
Computer simulation of the motion of macromolecules with crosslinks 1, 191
Computers, determining average molecular weight and Schultz heterogeneity coefficients for narrow dispersed polymers using gel permeation chromatography allowing for instrument widening without the use of - 2, 517
Conformation of the isolated helix of cellulose 10, 2333
Conformation properties, the sedimental-diffusion and viscometric analysis of the - and molecular rigidity of ladder-like polyphenyl siloxane in solution 11, 2705
Conformational changes in crystalline polycaproamide caused by stress 4, 857
Conformations, calculation of regular macromolecular - of polyvinyl alcohol 7, 1760
Conformations, the - and hydrodynamics of polydimethylsiloxanes with cyclic main-chain segments 5, 1109
Conidine, copolymerization of - and β-propiolactone 11, 2800
Conversion, correlation between sol yield and the degree of - in radical-initiated three-dimensional polymerization 2, 471
Co-oligophenylenesulphides, synthesis and some properties of isomeric - 3, 769
Copolyarylates, features of the synthesis of - by nonequilibrium copolycondensation 11, 2784
Copolycondensation, some features of nonequilibrium heterophase - 11, 2751
Copolycondensation, thin-layer interfacial - 5, 1227
Copolymer, the heterogeneous structure of the mutually penetrating networks based on an oligo-acrylate and a styrene–butadiene - 1, 83
Copolymer, the phase equilibrium and rheological properties of solutions of the - of acrylonitrile with methyl methacrylate and vinyl sulphonate in binary solvents 8, 1977

Copolymerization, homopolymerization of carborane exocyclic vinylsilanes and their - with methyl methacrylate 9, 2261
Copolymerization, homopolymerization of diethylaminoethyl methacrylate acetate and - with N-vinylpyrrolidone in various solvents 8, 2019
Copolymerization, kinetic study of the chain propagation mechanism in the alternating - of styrene with methyl methacrylate over diethyl aluminium chloride 9, 2174
Copolymerization, kinetic study of the mechanism of alternating - of maleic anhydride with vinylphenyl ether 2, 455
Copolymerization, kinetics and mechanism of - of phenylglycidyl ether with ε-caprolactone by the action of aniline 2, 495
Copolymerization of conidine and β-propiolactone 11, 2800
Copolymerization of methyl methacrylate with ethylene the presence of a VCl^4–$(iso\text{-}C_4H_9)_2AlCl$ catalyst 1, 246
Copolymerization of N-vinylsuccinimide with vinyl monomers in dimethyl sulphoxide 12, 2860
Copolymerization, principles of analysis of binary - of "special" systems of the first type 2, 523
Copolymerization, study of - under stationary conditions using the method of homogeneous Markov chains 2, 503
Copolymerization constants, study of the temperature dependence of the - for stilbene with styrene and acenaphthylene 1, 136
Copolymers, analysis of the ^{19}F NMR spectra of - vinylidene fluoride with tetrafluoroethylene, and of vinylidene fluoride with tetrafluoroethylene and hexafluoropropylene. The use of an empirical additive scheme and of the principle of alternation 3, 711
Copolymers, effect of an emulsifier on the microstructure of butadiene–methyl methacrylate - 6, 1522
Copolymers, effect of the type and concentration of ionogenic emulsifiers on graft polymerization when obtaining methyl methacrylate–butadiene–styrene - 4, 1022
Copolymers, interaction of - and copolymers of vinyl chloride and acrylic esters with ozone 7, 1708
Copolymers, interaction of homo- and - of vinyl chloride and acrylic esters with ozone 7, 1708
Copolymers, investigation of the influence of ionizing irradiation on the structure of - of ethylene with vinylsilanes 1, 114
Copolymers, ionites with enhanced permeability from - of styrene with diisopropenyl derivatives of diphenyl oxide, diphenyl methane and diphenyl 3, 678
Copolymers, liquid-crystalline - of cholesteric type 4, 1029
Copolymers, mechanical properties of network hydrogels of - of ethylene glycol monomethacrylate 4, 927
Copolymers, qualitative and quantitative analysis of random - and homopolymer blends by pyrolytic gas chromatography 11, 2696
Copolymers, quantitative determination of the vinylthio groups in divinyl sulphide - by IR and UV spectroscopy 7, 1845
Copolymers, special aspects of the thermal degradation of - of vinyl chloride with methyl acrylate 7, 1809
Copolymers, spectroscopic determination of the composition of bisulphite derivatives of - of acrolein with acrylic acid 7, 1842
Copolymers synthesized from vinyl monomers and unsaturated oligo-imides of carding diamines 5, 1138

Copolymers, the mechanical properties of fibres based on phenylene-1,3,4-oxadiazol - of various compositions 1, 64
Copolymers, the mechanism of the thermal degradation of - of methyl acrylate with oligo-organovinylsiloxanes 2, 358
Copolymers, thermal degradation of - of vinyl chloride with vinyl acetate 7, 1675
Copolymers, thermal stability of methyl methacrylate - with some dimethacrylates 11, 2650
Copper, soluble ternary complex of poly-4-vinylpyridine, bovine serum albumin and - 2, 299
Copper (II) ions, structure of the polymer coil of branched polyethylene imine in solution in the presence of - 9, 2209
Crazes, structure and adsorption properties of the material of - in glassy polyethylene terephthalate 6, 1350
Crosslinked copolymers, determining the amount of crosslinking agent—N,N′-methylene diacrylamide in - of diethyl ester of vinylphosphonic acid with acrylic acid 10, 2580
Crosslinked ethylene-propylene elastomers, relaxation transitions in - 8, 2012
Crosslinked polymers, thermal and thermal oxidative degradation of - based on epoxides and aromatic amines 12, 3040
Crosslinked polyurethanes, effect of surface-active substances on the formation of - 6, 1504
Crosslinked polyurethanes, photooxidation of - 4, 953
Crosslinking, influence of the fractional composition of difurfurylideneacetone oligomer on its - 9, 2229
Crosslinking agent, determining the amount of - —N,N′-methylenediacrylamide in crosslinked copolymers of diethyl ester of vinylphosphonic acid with acrylic acid 10, 2580
Crosslinking capability, the electronic structure of complexes of vinyl pyridines with metal halides and their - 8, 1853
Crosslinks, computer simulation of the motion of macromolecules with - 1, 191
Crystalline polycaproamide, conformational changes in - caused by stress 4, 857
Crystalline polymers, possibility of investigating the dynamic mechanical properties of - in the melting region in admixture with amorphous polymers 7, 1848
Crystalline polymers, simulation of the effect of continuous "tie chains" on mobility in partially - 1, 218
Crystalline polymers, simulation of the role of continuous "tie chains" in partially - 1, 210
Crystalline structure, polymers with biphenyl fragments in branches having liquid and - 9, 2147
Crystalline structure, relationship between the melting point and the - of polymers 9, 2255
Crystalline zones, machine calculations for polyaryleneimide chain conformations and packing in the - ; the combination of the atom–atom potentials method with X-ray structural analysis 10, 2404
Crystallization behaviour of oligomer–oligomer systems 4, 966
Crystallization, influence of - on the structure and adsorption properties of glassy polyethylene terephthalate strained in an adsorption-active medium 5, 1178
Crystallization of polyarylates based on bis-phenols with hexafluoroisopropylidene groups 11, 2792
Crystallization, the selective effect of the grafted chain length on the isothermal - of immiscible two-component systems based on high-density polyethylene and polyacrylonitrle 5, 1132

bis-(*o*-Cyanamines), synthesis and study of polymers based on tetranitriles of tetracarboxylic acids, triaminobenzenes and - 5, 1248
Cyclic polymer, towards a model of a - with excluded volume 1, 26
Cyclohexane, diffusion and sedimentation of poly-α-methylstyrene in - 9, 2113

Deformation, a model for the large reversible strain in a glassy polymer after - in an adsorption-active medium 3, 633
Deformation, an investigation of the connection between micro-crazing and the mechanical behaviour of glassy polyethyleneterephthalate during - in adsorption-active media 5, 1089
Deformation, longitudinal - and rupture of linear flexible-chain polymers 12, 2847
Deformation, resistance to - and intermolecular interaction in glassy polymers 5, 1071
Deformation, thermodynamics of high-elastic - of filled polyvinylchloride 1, 181
Degradation and spontaneous ignition studies of brominated polyphenylquinoxalines 4, 884
Degradation as a modification method of polymeric products. A review 3, 569
Degradation, influence of stabilizers of thermooxidative - of poly-4-methyl-1-pentene on its viscoelastic properties 6, 1413
Degradation, investigation of the synthesis and hydrolytic - of polyborodimethylsiloxanes 6, 1421
Degradation of polynaphthoylene benzimidazoles 1, 108
Degradation, relaxation nature of thermal - of polymers 5, 1293
Degradation, the mechanism of the thermal - of copolymers of methyl acrylate with oligo-organovinylsiloxanes 2, 358
Degradation, thermal, acid-hydrolytic and enzymatic - of cellulose 1, 1
Degradation, the thermal - of oligo-isobutylenes having oxygen-containing end groups 2, 349
Density, thermal effects and variation of the - of amorphous regions by elastic stressing of oriented polyethylene of different molecular weights 6, 1529
Depolarization, recording relaxation transitions in polymers by the simultaneous measurement of radiothermoluminescence and the current of thermostimulated - 1, 255
Desorption of antistatic substances from polyvinyl chloride films 8, 2025
Deuterated units, synthesis and study of polypropylene consisting of different units and containing - 12, 3027
Dextran solutions, study of the optical rotation of - containing metal ions 2, 484
Dextrane, separation of phases in aqueous solutions of polyethylene glycol and - 6, 1330
Diacetylarylenes, the synthesis and study of polyphenylene-type polymers based on the ethylketals of - and acetyldiphenyl-*o*-carborane 7, 1612
Diamines, copolymers synthesized from vinyl monomers and unsaturated oligo-imides of carding - 5, 1138
Dianhydrides, synthesis of polynaphthoylene benzimidazoles based on - of keto- and sulphone-bis-(4,5-dicarboxy-1-naphthyl) 7, 1753
Dielectric relaxation, effect of strain on - in filled rubber 11, 2655
Diene polymers, modification of - and polymer synthesis by reaction of triazolinediones with olefinic bonds 11, 2587
Diethyl aluminium chloride, kinetic study of the chain propagation mechanism in the alternating copolymerization of styrene with methyl methacrylate over - 9, 2174

Diethylaminoethylmethacrylate, radiation graft copolymerization of a binary mixture of 4-vinylpyridine and - 4, 832
N,N-Diethylaminopropylamide, study of the properties and conformations in solution of a styrene copolymer with maleic mono - 11, 2628
Diethyl ester, determining the amount of crosslinking agent—N,N′-methylenediacrylamide in crosslinked copolymers of - of vinylphosphonic acid with acrylic acid 10, 2580
Diffusion and sedimentation of poly-α-methylstyrene in cyclohexane 9, 2113
Diffusion in "barrier" layers of radiation-grafted polyethylene films 8, 1889
Diffusion, molecular characteristics of highly-substituted cellulose nitrate in solutions from forward - flow birefringence and viscometry 11, 2661
Diffusion of benzene, toluene and styrene in polyvinylchloride films 8, 2006
Diffusion, the - of water vapour in linear polyurethanes 4, 822
Difurfurylideneacetone oligomer, influence of the fractional composition of - on its crosslinking 9, 2229
α, ω-Dihydroxydiorganosiloxanes, interaction of oligoorganosilazoxane with - 8, 1950
Diisopropenyl derivatives, ionites with enhanced permeability from copolymers of styrene with - of diphenyl oxide, diphenyl methane and diphenyl 3, 678
Dilute solutions, associations in - of polyblock copolymers based on polydimethylsiloxane and polyarylates 2, 401
Dilute solutions, birefringence of - of an incompatible polymer mixture 2, 511
Dilute solutions, study of the mechanism of complex-formation in - of poly-N-vinylamides with the I_3^- ion 2, 490
Dilute solutions, study of the properties of - of terpolymers of styrene with acrylonitrile and methyl methacrylate 3, 657
Dimethacrylate polymers, spin probe investigation of triethylene glycol - 12, 2980
Dimethacrylates, densely crosslinked polymer compositions based on various types of - 10, 2438
Dimethacrylates, study of molecular distributions in linear oligoester acrylates using oligo(diethylene glycol adipate) - 7, 1771
Dimethacrylates, thermal stability of methyl methacrylate copolymers with some - 11, 2650
Dimethyl formamide (DMF), polymerization of glass-like solutions of N-phenyl maleimide in - 8, 1859
α,ω-**bis-(Dimethylhydroxysilyl)**-substituted cyclodisilazane oligomers 5, 1306
Dimethyl sulphoxide, copolymerization of N-vinylsuccinimide with vinyl monomers in - 12, 2860
Diols, on the mechanism of formation of oligomers based on secondary aliphatic-aromatic - 8, 1957
Diphenyl, ionites with enhanced permeability from copolymers of styrene with diisopropenyl derivatives of diphenyl oxide, diphenyl methane and - 3, 678
Diphenyl ether-formaldehyde, sulphocation-exchange resin membranes based on oligomers and polymers of - 5, 1255
Diphenyl methane, ionites with enhanced permeability from copolymers of styrene with diisopropenyl derivatives of diphenyl oxide, - and diphenyl 3, 678
Diphenyl oxide, ionites with enhanced permeability from copolymers of styrene with diisopropenyl derivatives of - diphenyl methane and diphenyl 3, 678
3,3′,4,4′-Diphenyloxide tetracarboxylic dianhydride, molecular weight chromatographic analysis of polyamic acids synthesized from *p*-phenylene diamine and - 4, 1055
Dispersed polymers, determining average molecular weights and Schultz heterogeneity coefficients for narrow - using gel permeation chromatography allowing for instrument widening without the use of computers 2, 517

ω-Dodecalactam, the anionic copolymerization kinetics of ε-caprolactam with - **12,** 2902
Dodecalactam polymerizations, capro- and - catalyzed by *d*-metal oxides: TiO_2, ZrO_2 and ZnO **4,** 907
Domain structure, the reversed gas-chromatographic study of the - formed by polyarylate-polydimethylsiloxane block copolymers **2,** 366
Drawing rates, features of the structural-mechanical behaviour of glassy polyethyleneterephthalate under strain in adsorption-active media over a wide range of - **4,** 959
Dynamic birefringence of solutions of flexible-chain polymers **7,** 1778
Dynamic birefringence of poly-(4,4'-hydroxydiphenylene) pyromellitic amic acid solutions **3,** 650
Dynamic method, a - for determining visco-elastic characteristics of polymeric materials **11,** 2839

Elastomers, catalytic activity of a polyurethane–tin dibutyl dilaurate system in the synthesis of three-dimensional crosslinked - **3,** 763
Elastomers, influence of ionizing irradiation on the electrical strength of polyolefines and their blends with - **7,** 1742
Elastomers, relaxation processes in - at low strains from the data of relaxation spectrometry, stress-strain and thermomechanical curves **2,** 313
Elastomers, relaxation transitions in crosslinked ethylene-propylene - **8,** 2012
Electrical conductivity temperature dependence of jump - of semiconductor pyropolymers **10,** 2390
Electrical strength, influence of ionizing irradiation on the - of polyolefines and their blends with elastomers **7,** 1742
Electron micrographs, quantitative treatments of - from fracture surfaces of oriented capron monofibres **1,** 33
Electron microscopy method, a study of carbon black distribution in polymers by the - **6,** 1325
Electronic spectroscopy, the study of the structure and polymerization of the products of pyrolysis of α,α'-dichloro-*p*-xylene and of α,α'-dibromo-*p*-xylene by IR and - **9,** 2101
Electronic structure, effect of features of - on properties of rigid-chain aromatic polyamides and fibres based on them **8,** 2058
Electronic structure, the - of complexes of vinyl pyridines with metal halides and their crosslinking capability **8,** 1853
Emulsifier, effect of an - on the microstructure of butadiene–methyl methacrylate copolymers **6,** 1522
Emulsifiers, effect of the type and concentration of ionogenic - on graft polymerization when obtaining methyl methacrylate–butadiene–styrene copolymers **4,** 1022
Emulsion copolymerization, study of the kinetic aspects of - of butyl acrylate with the methacrylic ester of α-hydroxyethyl-tert-butyl peroxide **10,** 2396
Emulsion polymerization of monomers—chain transfer agents **9,** 2222
Emulsion polymerization processes, on the influence of intensive hydrodynamic action on - **7,** 1700
Emulsion PVC, relationship between the chemical structure and thermal stability of - **5,** 1204
End groups, determining - in poly-*p*-phenylene terephthalamides **1,** 258
End groups, the thermal degradations of oligo-isobutylenes having oxygen-containing - **2,** 349

Epichlorhydrin, kinetics and mechanism of cationic polymerization of - in the presence of sulphuric acid 4, 1035
Epoxide systems, influence of modifiers on gelation and glass transition during the hardening of - 2, 396
Epoxides, thermal and thermal oxidative degradation of crosslinked polymers based on - and aromatic amines 12, 3040
Epoxyamide networks, liquid–glass structural transition in the formation of densely crosslinked - . Effect of transition on properties of polymers 10, 2564
Epoxy resin–fibre systems, temperature dependence of bonding strength in - 1, 123
Epoxy resins, a spin-probe study of molecular mobility in modified - 4, 922
EPR–PAN graft copolymers, thermomechanical properties of - containing a poly-conjugated system 4, 941
ESR spectra, influence of gases on the - and on the thermoinitiated paramagnetism of polyacrylonitrile semiconductors 2, 425
Esters, on the structure of branched polymers of diallyl - 8, 1965
Ethylene, copolymerization of methyl methacrylate with - in the presence of a VCl_4–(iso-C_4H_9)$_2$AlCl catalyst 1, 246
Ethylene, investigation of the influence of ionizing irradiation on the structure of copolymers of - with vinylsilanes 1, 114
Ethylene diamine, features of porous structure of macroporous low-basicity anion-exchange resins based on - 8, 2031
Ethylene glycol monomethacrylate, mechanical properties of network hydrogels of copolymers of - 4, 927
Ethylene polymerization, activation routes of - by homogeneous catalysts based on titanium cyclopentadiene complexes 9, 2162
Ethylene polymerization, on enhancing the reactivity of supported Ziegler catalysts in elementary steps of - with inert supports modified by a magnesium compound 6, 1458
Ethylene–propylene copolymer–methylvinylpyridine complexes, structure and phase equilibrium in - with metal halides 11, 2817
Ethylene–propylene copolymers, ^{13}C NMR study of the molecular structure of - synthesized on supported Ziegler catalysts 5, 1197
Ethylene–propylene copolymers, polydispersity of - synthesized on supported Ziegler catalysts 7, 1724
Ethylene–vinylsilane copolymers, properties of - and their variation after irradiation 3, 785
Ethylketals, the synthesis and study of polyphenylene-type polymers based on the - of diacetylarylenes and acetyldiphenylyl-*o*-carborane 7, 1612

Features of cold-drawing polymers in two-component adsorption-promoting media 5, 1146
Features of porous structure of macroporous low-basicity anion-exchange resins based on ethylene diamine 8, 2031
Features of radical polymerization in alcohols of vinylpyridinium salts, varying the hydrophylic/probic balance 4, 947
Features of styrene polymerization initiated by peroxide initiators grafted on the Aerosil filler surface 9, 2248
Features of thermal degradation of polyarylate amides 9, 2285
Features of the structural-mechanical behaviour of glassy polyethyleneterephthalate under strain in adsorption-active media over a wide range of drawing rates 4, 959
Ferrocene, on the problem of link diversity in polymers of acetyl derivatives of - 4, 873

Fibres, effect of features of electronic structure on properties of rigid-chain aromatic polyamides and - based on them 8, 2058
Fibres, structural changes in shrinkable - of modified polypropylene 1, 14
Fibres, the mechanical properties of - based on phenylene-1,3,4-oxadiazol copolymers of various compositions 1, 64
Fibres, the supermolecular structure changes in - based on poly-*p*-phenylene-1,3,4-oxadiazole during pyrolysis 6, 1398
Filled compositions, the structure of - based on polyvinylchloride 9, 2106
Filled polystyrene, glass transition in - at elevated pressures 1, 130
Filled polyvinylchloride, thermodynamics of high-elastic deformation of - 1, 181
Filled polyvinyl chloride (PVC), thermal conductivity study of the boundary layer in and polyvinyl butyral (PVB) 7, 1652
Filled rubber, effect of strain on dielectric relaxation in - 11, 2655
Filler, effect of a - on the formation of network polyurethanes 3, 624
Filler surface, the nature of the boundary layer between polyvinylchloride and a - 1, 41
Films, desorption of antistatic substances from polyvinylchloride - 8, 2025
Films, diffusion in "barrier" layers of radiation-grafted polyethylene - 8, 1889
Films, diffusion of benzene, toluene and styrene in polyvinylchloride - 8, 2006
Films, rupture of thin polymer - 2, 447
Flexible-chain polymers, dynamic birefringence of solutions of - 7, 1778
Flexible-chain polymers, longitudinal deformation and rupture of linear - 12, 2847
Flow birefringence and rigidity of molecules of aromatic copolyamides of *para*-structure 10, 2375
Flow birefringence, the - and rigidity equilibrium of *p*- and *m*-aromatic copolyamide molecules 12, 2908
Fluorescence quenching by bromide ions of the acridinium cation in polyvinyl alcohol films 8, 1915
Formation of kink bands during orientation drawing of linear polyethylene 9, 2295
Formation of polyimides, the mechanism of amide catalysis of the reaction of the - 10, 2358
Fractionation, study of molecular weight distribution of polyarylates by gel-permeation chromatography and - 9, 2304
Fracture of polymers in brittle and quasi-brittle states 4, 1011
Fracture surfaces, quantitative treatment of electron micrographs from - of oriented capron monofibres 1, 33
Friedel–Crafts reaction, chemical bond formation between poly-1,1,2-trichlorobuta-1,3-diene and polystyrene by the - 5, 1116

Gas-chromatographic study, the reversed - of the domain structure formed by polyarylate-polydimethylsiloxane block copolymers 2, 366
Gas chromatography, qualitative and quantitative analysis of random copolymers and homopolymer blends by pyrolytic - 11, 2696
Gaseous phase, some mechanical properties of poly-*p*-xylene films obtained from - 5, 1215
Gases influencing the ESR spectra and the thermoinitiated paramagnetism of polyacrylonitrile semiconductors 2, 425
Gas permeability, methods and instrument for determining the - of polymer films over a wide range of temperature and pressure differences using an IPDO-2A omegatron device for measuring partial pressures 5, 1313
Gelation and network formation in polyaddition reactions 8, 2063
Gelation, influence of modifiers on - and glass transition during the hardening of epoxide systems 2, 396

Gel-chromatographic analysis, concentration effects and the determination of additional parameters in - of polyisoprene 3, 798
Gel-effect mechanism, on the - in radical polymerization 8, 1873
Gel peremation chromatography, determining average molecular weights and Schultz heterogeneity coefficients for narrow dispersed polymers using - allowing for instrument widening without the use of computers 2, 517
Gel-permeation chromatography, study of molecular weight distribution of polyarylates by - and fractionation 9, 2304
Gibbs energy, effect of the type of sorbate on the - of mixing of polymers calculated from data of static sorption 9, 2311
Glass, strength and type of breakdown of adhesive compounds for polyolefins with metal and - 3, 746
Glass-like solutions, polymerization of - of N-phenyl maleimide in dimethyl formamide (DMF) 8, 1859
Glass temperature, effect of thermal prehistory on the - of organo-silicon polymers 4, 1002
Glass temperature, rupture of linear polybutadiene in liquid media above the - 9, 2215
Glass transition, chain transfer during the low-temperature polymerization of vinyl monomers at the - of an alcohol matrix 5, 1210
Glass transition in filled polystyrene at elevated pressures 1, 130
Glass transition, influence of modifiers on gelation and - during the hardening of epoxide systems 2, 396
Glass transition temperatures, the chemical structure and - of polyarymides 2, 409
Glassy polyethyleneterephthalate, an investigation of the connection between micro-crazing and the mechanical behaviour of - during deformation in adsorption-active media 5, 1089
Glassy polyethyleneterephthalate, features of the structural-mechanical behaviour of - under strain in adsorption-active media over a wide range of drawing rates 4, 959
Glassy polyethylene terephthalate, influence of crystallization of the structure and adsorption properties of - strained in an adsorption-active medium 5, 1178
Glassy polyethylene terephthalate, structure and adsorption properties of the material of crazes in - 6, 1350
Glassy polymer, a model for the large reverisble strain in a - after deformation in an adsorption-active medium 3, 633
Glassy polymers, resistance to deformation and intermolecular interaction in - 5, 1071
Glassy state, photoelastic properties of plasticized polymers in the - 10, 2522
Graft copolymerization, radiation - of a binary mixture of 4-vinylpyridine and diethylaminoethylmethacrylate 4, 832
Graft copolymer solutions, effect of the type of solvent on properties of - of cellulose diacetate with polystyrene and their mixtures 3, 756
Graft polymerizaion, effect of the type and concentration of ionogenic emulsifiers on - when obtaining methyl methactylate–butadiene–styrene copolymers 4, 1022
Graft SKEP–PAN copolymers, aspects of the thermal transformation of - 4, 814
Grafted chain length, the selective effect of the - on the isothermal crystallization of immiscible two-component systems based on high-density polyethylene and polyacrylonitrile 5, 1132
Grafting, study of the - of methyl acrylate to (ethylene oxy) cellulose 10, 2342

Hardening, influence of modifiers on gelation and glass transition during the - of epoxide systems 2, 396

Heat treatment, change in the structural state and viscoelastic properties of plasticized polyvinyl chloride under - 10, 2509
Heat treatment, the structural changes in linear polyheteroarylene carboranes during - 6, 1364
Heating, phase transitions in amorphized rigid and semirigid polymers under - 10, 2502
Heterocyclic main-chain units, polyimides containing various - 8, 1909
Heterocyclic polymers, thermal degradation of polyamides and certain - in sulphuric acid solutions 3, 591
Heterogeneity, IR spectroscopy for quantitative determinations of the structural unit - of carborane-containing polyoxyamides 1, 155
Heterogeneous structure, the - of the mutually penetrating networks based on an oligo-acrylate and a styrene–butadiene copolymer 1, 83
Hexafluoroisopropylidene groups, crystallization of polyarylates based on bis-phenols with - 11, 2792
Hexafluoropropylene, analysis of the ^{19}F NMR spectra of copolymers of vinylidene fluoride with tetrafluoroethylene, and of vinylidene fluoride with tetrafluoroethylene and - . The use of an empirical additive scheme and of the principle of alternation 3, 711
Hexamethylcyclotrisiloxane, study of polymerization of - in the presence of trimethylsilanol 3, 733
High-density polyethylene, the interaction of - in blends with polyoxymethylene 8, 1894
High-density polyethylene, the selective effect of the grafted chain length on the isothermal crystallization of immiscible two-component systems based on - and polyacrylonitrile 5, 1132
High-elastic deformation, thermodynamics of - of filled polyvinylchloride 1, 181
High-elastic state, relaxation nature and regularities of breakdown of crosslinked and non-crosslinked polymers in the - 6, 1554
Homopolymer blends, qualitative and quantitative analysis of random copolymers and - by pyrolytic gas chromatography 11, 2696
Homopolymerization of carborane exocyclic vinylsilanes and their copolymerization with methyl methacrylate 9, 2261
Homopolymerization of diethylaminoethyl methacrylate acetate and copolymerization with N-vinylpyrrolidone in various solvents 8, 2019
Hydration, infrared analysis of the - of poly-N-vinylpyrrolidone 1, 168
Hydration, IR-spectral study of the - of cellulose nitrates 7, 1639
Hydrocarbons, positronium decay in - of large molecular weight 7, 1631
Hydrodynamic action, on the influence of intensive - on emulsion polymerization processes 7, 1700
Hydrodynamic conditions, adsorption of blood plasma proteins on a hydrophobic polymer surface dependent on - 5, 1272
Hydrodynamic properties, the - and the rigidity equilibrium in DMA and sulphuric acid of polyamidobenzimidazole molecules 9, 2136
Hydrodynamic properties, the - of solutions of carbochain polymers containing the indazole ring 11, 2758
Hydrodynamics, the conformations, and - of polydimethylsiloxanes with cyclic main-chain segments 5, 1109
Hydrogen peroxide–ascorbic acid redox system, initiation of the polymerization of acrylic acid and sodium acrylate by the - 11, 2622
Hydrolytic degradation, investigation of the synthesis and - of polyborodimethylsiloxanes 6, 1421

Hydrolytic stability of polyorganosiloxanes as a function of their structure 3, 606
Hydrophylization of polymer surfaces by synthetic polyelectrolytes and their complexes 3, 720
Hydrosylylation, introduction of organosiloxanes into oligophenylenes by - 7, 1748
p-**Hydroxy**-*p'*-n-**amyloxyazobenzene,** X-ray study of polymeric liquid crystals based on - 7, 1692
α-**Hydroxyethyl-tert-butyl peroxide,** study of the kinetic aspects of emulsion copolymerization of butyl acrylate with the methacrylic ester of - 10, 2396

Inclusions, local relaxation properties of polymer chains containing - 5, 1097
Indazole ring, the hydrodynamic properties of solutions of carbochain polymers containing the - 11, 2758
Infrared analysis of the hydration of poly-N-vinylpyrrolidone 1, 168
Inhibition of the polymerization of methacrylate by the phenothiazine–sulphuric acid system 3, 777
Inhibitors, kinetic characteristics of methylene quinones as - of polypropylene oxidation 1, 163
Inhibitors, mixtures of metal dithiocarbamates with amine- or phenol-type anti-oxidants as oxidative degradation - for polyisoprene 9, 2157
Inhomogeneity, influence of unit type - of the thermal stability of polyimides 7, 1732
Inhomogeneity, investigation of functionality - of linear polyesters as components for polyurethane thermoplastics 5, 1221
Inhomogeneity, on the influence of the unit type - of polymers on their thermal characteristics 9, 2234
Inhomogeneous structure, high elastic properties of polymer networks of - 11, 2745
Initial viscosity, concerning the limited possibility of using average molecular weights to establish a correlation with - 4, 866
Initiating systems, synthesis of bioresistant polymers and block copolymers using - based on mixed metalorganic compounds of mercury, tin and lead 3, 643
Interaction, investigation of the structure and thermodynamic parameters of - of components in plasticized cellulose nitrate 6, 1452
Interaction of homo- and copolymers of vinyl chloride and acrylic esters with ozone 7, 1708
Interaction of oligoorganosilazoxane with α,ω-dihydroxydiorganosiloxanes 8, 1950
Interaction of sols of polysilicic acid with quaternized poly-4-vinylpyridines 10, 2529
Interaction, the - of high-density polyethylene in blends with polyoxymethylene 8, 1894
Interatomic distances, on the characteristic nature of vibrational amplitudes of - 2, 386
Intermolecular interaction, a study of - in aqueous solutions of polymers and cationic surfactants by polarized luminescence 6, 1356
Intermolecular interaction, resistance to deformation and - in glassy polymers 5, 1071
Internal friction spectra, relaxation transitions and - 6, 1479
Inversion of IR dichroism, on the - in segmented polyurethane elastomers 11, 2679
I_3^- **ion,** study of the mechanism of complex-formation in dilute solutions of poly-N-vinyl amides with the - 2, 490
Ionic strength, effect of the - and pH of the medium on the behaviour of complexes formed by bovine serum albumin with poly-4-vinyl-N-ethylpyridinium bromide in aqueous solutions 2, 280
Ionites with enhanced permeability from copolymers of styrene with diisopropenyl derivatives of diphenyl oxide, diphenyl methane and diphenyl 3, 678

Ionizing irradiation, influence of - on the electrical strength of polyolefines and their blends with elastomers 7, 1742
Ionizing irradiation, investigation of the influence of - on the structure of copolymers of ethylene with vinylsilanes 1, 114
Ionogenic emulsifiers, effect of the type and concentration of - on graft polymerization when obtaining methyl methacrylate–butadiene–styrene copolymers 4, 1022
IR and electronic spectroscopic study of the structure and polymerization of 9,10-anthraquinodimethane 12, 2933
IR and UV spectroscopy, quantitative determination of the vinylthio groups in divinyl sulphide copolymers by - 7, 1845
Irradiated polyethylene, localization of crosslinking bonds in - 12, 2957
Irradiation, influence of ionizing - on the electrical strength of polyolefines and their blends with elastomers 7, 1742
Irradiation, properties of ethylene–vinylsilane copolymers and their variation after - 3, 785
IR-spectral study of the hydration of cellulose nitrates 7, 1639
IR-spectroscopic study, an - of the thermo-oxidative ageing of certain butadiene–styrene copolymers 4, 807
IR spectroscopy for quantitative determinations of the structural unit heterogeneity of carborane containing polyoxyamides 1, 155
IR spectroscopy, the study of the structure and polymerization of the products of pyrolysis of α,α′-dichloro-*p*-xylene and of α,α′-dibromo-*p*-xylene by electronic and - 9, 2101
Isocyanates, the polycyclotrimerization of - 6, 1374
Isomerization, on the - of propylene oxide during tetrahydrofuran polymerization by the catalyst system BF_3–propylene oxide 12, 2964
Isothermal crystallization, role of the functionality of activators during - accompanying the activated anionic polymerization of ε-caprolactam 6, 1485
Isothermal crystallization, the selective effect of the grafted chain length on the - of immiscible two-component systems based on high-density polyethylene and polyacrylonitrile 5, 1132

Kinetic characteristics of methylene quinones as inhibitors of polypropylene oxidation 1, 163
Kinetic parameters for the polymerization of butadiene by certain titanium catalytic systems 1, 57
Kinetic regularities of the oxidative degradation of solid polypropylene 5, 1239
Kinetic study of catalysis of the chain transfer reaction to monomer in the radical polymerization of methyl methacrylate 5, 1158
Kinetic study of the chain propagation mechanism in the alternating copolymerization of styrene with methyl methacrylate over diethyl aluminium chloride 8, 2174
Kinetic study of the mechanism of alternating copolymerization of maleic anhydride with vinylphenyl ether 2, 455
Kinetics and mechanism of cationic polymerization of epichlorhydrin in the presence of sulphuric acid 4, 1035
Kinetics and mechanism of copolymerization of phenylglycidyl ether with ε-caprolactone by the action of aniline 2, 495
Kinetics and mechanism of the thermooxidative degradation of polyisoprene rubber 2, 419

Kinetics, effect of conditions of synthesis on - of structure-formation of polycaproamide during anionic adiabatic polymerization 10, 2545
Kinetics, effect of molecular interactions and molecular mobility on - of breakdown of chemical bonds in a polymer 7, 1788
Kinetics of the variation of molecular weight distribution in branched radical polymerization and its relation with processes of side chain formation 12, 3009
Kinetics, the - of the inhibited methacrylic acid polymerization in bulk and in solution 1, 77
Kink bands, formation of - during orientation drawing of linear polyethylene 9, 2295
Kink bands in low-density oriented polyethylene 5, 1279

Ladder-like polyphenyl siloxane, the sedimentation-diffusion and viscometric analysis of the conformation properties and molecular rigidity of - in solution 11, 2705
Ligands, metal-organic Ti–Al complexes containing phenoxy - as catalysts of ethylene polymerization 11, 2766
Light-scattering, comparison of - with X-ray diffraction data on spherulite deformation in polyethylene films 10, 2431
Light scattering study of butadiene–styrene block copolymer solutions 7, 1626
Light scattering, study of the structure of water-soluble complexes of bovine serum albumin with poly-4-vinyl-N-ethyl-pyridinium bromide by - 6, 1512
Light-shielding action, the mechanism of the - of metal dialkyl dithiocarbamates in polydienes 8, 1882
Linear polybutadiene, rupture of - in liquid media above the glass temperature 9, 2215
Linear polyethylene, formation of kink bands during orientation drawing of - 9, 2295
Linear polyurethane, synthesis and calorimetric investigation of oligosiloxane glycols and - based on the latter 10, 2486
Liquid-crystalline copolymers of cholesteric type 4, 1029
Liquid crystalline structure, polymers with biphenyl fragments in branches having a crystalline and - 9, 2147
Liquid–glass structural transition in the formation of densely crosslinked epoxyamine networks. Effect of transition on properties of polymers 10, 2564
Liquid media, influence of the orientation of polypropylene in - on its sorption properties 4, 986
Liquid media, rupture of linear polybutadiene in - above the glass temperature 9, 2215
Liquid-solid phase boundary, the adsorption-desorption dynamics for macromolecules at the - 2, 330
Lithium, polycondensation of 4-$(ClC_6H_4)_2X$(X=S, SO_2, CO) and $(ClC_6H_4)_2$ monomers under the action of metallic - 12, 2952
"Live" polymers, stability of - in tetrahydrofuran in the presence of α-methylstyrene 12, 3032
Low density polyethylene (LDPE), the effects of temperature, pressure and volume on the stress relaxation properties of - 7, 1593
Low molecular weight substances, the sorption of - by atactic polypropylene 12, 2919
Low-temperature polymerization, chain transfer during the - of vinyl monomers at the glass transition of an alcoholic matrix 5, 1210
Luminescence, a study of intermolecular interaction in aqueous solutions of polymers and cationic surfactants by polarized - 6, 1356

Machine calculations for polyaryleneimide chain conformations and packing in the crystalline zones; the combination of the atom–atom potentials method with X-ray structural analysis 10, 2404

Macromolecules, autoionization mechanism of the rupture of chemical bonds in - 3, 741
Macromolecules, computer simulation of the motion of - with crosslinks 1, 191
Macromolecules, structure formation in - of triblock copolymers 12, 2893
Macromolecules, the adsorption-desorption dynamics for - at the liquid-solid phase boundary 2, 330
Macroporous glasses, effect of temperature, solvent composition and pressure on the adsorption and chromatography of polystyrenes on - 2, 304
Macroradicals, probing the accessibility of - in polypropylene samples of varying morphology 3, 792
Magnesium compound, on enhancing the reactivity of supported Ziegler catalysts in elementary steps of ethylene polymerization with inert supports modified by a - 6, 1458
Main-chain segments, the conformations and hydrodynamics of polydimethylsiloxanes with cyclic - 5, 1109
Maleic anhydride, kinetic study of the mechanism of alternating copolymerization of - with vinylphenyl ether 2, 455
Maleic anhydride, on the mechanism of radical copolymerization of - with *trans*-stilbene 3, 689
Markov chains, study of copolymerization under stationary conditions using the method of homogeneous - 2, 503
Mechanical loss tangent, frequency dependence of the - for a system of two-block polymer chains 10, 2349
Mechanical properties and microheterogeneity of blended polycarbonate films 7, 1715
Mechanical properties of network hydrogels of copolymers of ethylene glycol monomethacrylate 4, 927
Mechanical properties, the link between the - produced by thermal imidization of poly-(*p,p'*-diphenyleneoxy)-pyromellitic amic acid and the reaction conditions 4, 915
Mechanical properties, the - of fibres based on phenylene-1,3-4-oxadiazol copolymers of various compositions 1, 64
Mechanical relaxation, influence of the degree of monolithization on the - properties of polymers 6, 1446
Mechanical relaxation in polyethylene with a different thermal prehistory 9, 2128
Mechanical tests, statistical analysis of the results of - of standard samples of thermoactive poly-bis-maleimideamines 7, 1803
Mechanism and kinetics of cationic polymerization of epichlorhydrin in the presence of sulphuric acid 4, 1035
Mechanism and kinetics of copolymerization of phenylglycidyl ether with ε-caprolactone by the action of aniline 2, 495
Mechanism and kinetics of the thermooxidative degradation of polyisoprene rubber 2, 419
Mechanism, a possible - for the formation of polyolefin blends 4, 839
Mechanism, kinetic study of the - of alternating copolymerization of maleic anhydride with vinylphenyl ether 2, 455
Mechanism, on the - of formation of oligomers based secondary aliphatic-aromatic diols 8, 1957
Mechanism, on the - of radical copolymerization of maleic anhydride with *trans*-stilbene 3, 689
Mechanism, study of the - of complex formation in dilute solutions of poly-N-vinylamides with the I_3^- ion 2, 490

Mechanism, study of the - of tetrahydrofuran homopolymerization with the catalyst system BF_3 + oxypropylene based on the MWD data 4, 889
Mechanism, the - of amide catalysis of the reaction of the formation of polyimides 10, 2358
Mechanism, the - of the light-shielding action of metal dialkyl dithiocarbamates in polydienes 8, 1882
Mechanism, the - of the stabilizing effect of thiacyclanes 3, 601
Mechanism, the - of the thermal degradation of copolymers of methyl acrylate with oligo-organovinylsiloxanes 2, 358
Mechanisms, analysis of - of rotational motion of polybutadiene macromolecules 4, 976
Mechanisms of oxirane copolymerizations with thiiranes over diethyl zinc-based catalytic systems 10, 2410
Melt copolymerization, the migrational - of anilinefluorene with some aliphatic bis-maleimides 8, 1935
Melt, surface oxidation study on a polyethylene - 7, 1617
Melting point, relationship between the - and the crystalline structure of polymers 9, 2255
Melting points, determining - of polymer crystallosolvates by measuring the turbidity of the system 8, 2048
Melting regions, possibility of investigating the dynamic mechanical properties of crystalline polymers in the - in admixture with amorphous polymers 7, 1848
Mesomorphous state, the - of polyamic acids 5, 1125
Metal, strength and type of breakdown of adhesive compounds for polyolefins with - and glass 3, 746
Metal dialkyl dithiocarbamates, the mechanism of the light-shielding action of - in polydienes 8, 1882
Metal dithiocarbamates, mixture of - with amine- or phenol-type anti-oxidants as oxidative degradation inhibitors for polyisoprene 9, 2157
Metal halides, structure and phase equilibrium in ethylene–propylene copolymer–methylvinylpyridine complexes with - 11, 2817
Metal ions, study of the optical rotation of dextran solutions containing - 2, 484
Metalorganic compounds, synthesis of bioresistant polymers and block copolymers using initiating systems based on mixed - of mercury, tin and lead 3, 643
Metal-organic Ti–Al complexes containing phenoxy ligands as catalysts of ethylene polymerization 11, 2766
d-**Metal oxides,** capro- and dodecalactam polymerizations catalyzed by - : TiO_2, ZrO_2 and ZnO 4, 907
Metals, influence of acid complexes of - of the first transitional series on the polymerization of styrene 10, 2382
Methacrylic acid, the kinetics of the inhibited - polymerization in bulk and in solution 1, 77
Methacrylic ester, study of the kinetic aspects of emulsion copolymerization of butyl acrylate with the - of α-hydroxyethyl-tert-butyl peroxide 10, 2396
Methanol, sorption of - in the system methanol–polymethylmethacrylate 6, 1338
Method of homogeneous Markov chains, study of copolymerization under stationary conditions using the - 2, 503
Methods and instrument for determining the gas permeability of polymer films over a wide range of temperature and pressure differences using an IPDO-2A omegatron device for measuring partial pressures 5, 1313
Methods, polyvinylchloride stabilization - . A review 3, 552
Methylacrylate, inhibition of the polymerization of - by the phenothiazine–sulphuric acid system 3, 777

Methyl acrylate, radiation-induced postpolymerization of solid - 7, 1797
Methyl acrylate, special aspects of the thermal degradation of copolymers of vinyl chloride with - 7, 1809
Methyl acrylate, study of the grafting of - to (ethylene oxy) cellulose 10, 2342
Methyl acrylate, the mechanism of the thermal degradation of copolymers of - with oligo-organovinylsiloxanes 2, 358
2,2′-Methylene-bis-(4-methyl-6-tert. butylphenol) radiation-chemical oxidation of polypropylene in the presence of - 3, 617
Methylenechloride, structure of concentrated solutions of cellulose triacetate in - and acetic acid 5, 1082
3-Methyl-3-chloromethyloxetane, molecular weight distribution analysis during polymerization of - with the catalytic system Al(iso-$C_4H_9)_3$–H_2O 1, 70
N,N′-Methylenediacrylamide, determining the amount of crosslinking agent– - in crosslinked copolymers of diethyl ester of vinylphosphonic acid with acrylic acid 10, 2580
Methylene quinones, kinetic characteristics of - as inhibitors of polypropylene oxidation 1, 163
Methyl methacrylate–butadiene–styrene copolymers, effect of the type and concentration of ionogenic emulsifiers on graft polymerization when obtaining - 4, 1022
Methyl methacrylate, copolymerization of - with ethylene in the presence of a VCl_4–(iso-$C_4H_9)_2AlCl$ catalyst 1, 246
Methyl methacrylate copolymers, thermal stability of - with some dimethacrylates 11, 2650
Methyl methacrylate, homopolymerization of carborane exocyclic vinylsilanes and their copolymerization with - 9, 2261
Methyl methacrylate, kinetic study of catalysis of the chain transfer reaction in the radical polymerization of - 5, 1158
Methyl methacrylate, kinetic study of the chain propagation mechanism in the alternating copolymerization of styrene with - over diethyl aluminium chloride 9, 2174
Methyl methacrylate, study of the properties of dilute solutions of terpolymers of styrene with acrylonitrile and - 3, 657
Methyl methacrylate, the phase equilibrium and rheological properties of solutions of the copolymer of acrylonitrile with methyl methacrylate and vinyl sulphonate in binary solvents 8, 1977
α-Methylstyrene, stability of "live" polymers in tetrahydrofuran in the presence of - 12, 3032
Micro-crazing, an investigation of the connection between - and the mechanical behaviour of glassy polyethyleneterephthalate during deformation in adsorption-active media 5, 1089
Microheterogeneity, mechanical properties and - of blended polycarbonate films 7, 1715
Microstructure, effect of an emulsifier on the - of butadiene–methyl methacrylate copolymers 6, 1522
Mixtures of metal dithiocarbamates with amine- of phenol-type anti-oxidants as oxidative degradation inhibitors for polyisoprene 9, 2157
Mobility, study of segmental - of spin-labelled synthetic macromolecules in solutions 6, 1581
Model, a - for the large reversible strain in a glassy polymer after deformation in an adsorption-active medium 3, 633
Model, towards a - of a cyclic polymer with excluded volume 1, 26
Modification method, degradation as a - of polymeric products. A review 3, 569
Modifiers, influence of - on relation and glass transition during the hardening of epoxide systems 2, 396
Modifiers, structural transformations of polycarbonate melts in the presence of - 3, 670

Molecular bromine, complex formation between polyazine with a system of conjugated multiple bonds and - **5,** 1233
Molecular characteristics of highly-substituted cellulose nitrate in solutions from forward diffusion, flow birefringence and viscometry **11,** 2661
Molecular distributions, study of - in linear oligoester acrylates using oligo(diethyleneglycol adipate) dimethacrylates **7,** 1771
Molecular interactions, effect of - and molecular mobility of kinetics of breakdown of chemical bonds in a polymer **7,** 1788
Molecular mass, the influence of - acetate group content and synthesis method on the structuring of polyvinyl alcohol (PVA) in aqueous solutions **6,** 1344
Molecular mobility, a spin-probe study of - in modified epoxy resins **4,** 922
Molecular mobility, effect of molecular interactions and - on kinetics of breakdown of chemical bonds in a polymer **7,** 1788
Molecular mobility, NMR investigation of the - and structure of polysulphone–polybutadiene and polysulphone–polyethylene oxide block copolymers **10,** 2474
Molecular motion, study of - in chloroprene rubber by nuclear quadrupole resonance, radiothermoluminescence and dynamic mechanical analysis using a torsion pendulum **8,** 1985
Molecular rigidity, the sedimentation-diffusion and viscometric analysis of the conformation properties and of ladder-like polyphenyl siloxane in solution **11,** 2705
Molecular structure, ^{13}C NMR study of the - of ethylene–propylene copolymers synthesized on supported Ziegler catalysts **5,** 1197
Molecular weight, factors affecting the - in the alternating copolymerization of butadiene with propylene over the $TiCl_4$–$CH_3COC_6H_3$–$Al(iso\text{-}C_4H_9)_3$ catalyst system **10,** 2426
Molecular weight, positronium decay in hydrocarbons of large - **7,** 1631
Molecular weight chromatographic analysis of polyamic acids synthesized from *p*-phenylene diamine and 3,3′,4,4′-diphenyloxide tetracarboxylic dianhydride **4,** 1055
Molecular weight distribution, kinetics of the variation of - in branched radical polymerization and its relation with processes of side chain formation **12,** 3009
Molecular weight distribution, main principles of the mutual relation between - and properties of polydispersed polymers **8,** 2052
Molecular weight distribution, study of - of polyarylates by gel-permeation chromatography and fractionation **9,** 2304
Molecular weight distribution analysis during polymerization of 3-methyl-3-chloromethyloxetane with the catalytic system $Al(iso\text{-}C_4H_9)_3$–H_2O **1,** 70
Molecular weight distributions, determination of the dependence of the chain transfer constant on the degree of polymerization by analysis of - **5,** 1169
Molecular weight distributions, excluding the influence of concentration effects when calculating - of polymers using rapid sedimentation data **11,** 2824
Molecular weights, concerning the limited possibility of using average - to establish a correlation with initial viscosity **4,** 866
Molecular weights, determining average - and Schultz heterogeneity coefficients for narrow dispersed polymers using gel formation chromatography allowing for instrument widening without the use of computers **2,** 517
Molecular weights, thermal effects and variation of the density of amorphous regions by elastic stressing of oriented polyethylene of different - **6,** 1529
Molecules, flow birefringence and rigidity of - of aromatic copolyamides of *para*-structure **10,** 2375

Molecules, the flow birefringence and rigidity equilibrium of *p*- and *m*-aromatic copolyamide - **12,** 2908
Monofibres, quantitative treatment of electron micrographs from fracture structures of oriented capron - **1,** 33
Monolithization, influence of the degree of - on the mechanical relaxation properties of polymers **6,** 1446
Monomer, kinetic study of catalysis of the chain transfer reaction to - in the radical polymerization of methyl methacrylate **5,** 1158
Monomer conversions, the determination of the rate constants of the main radical polymerization reactions at large - **7,** 1603
Monomers, emulsion polymerization of - —chain transfer agents **9,** 2222
Monomers, polycondensation of 4-$(ClC_6H_4)_2X$(X=S, SO_2, CO) and $(ClC_6H_4)_2$ - under the action of metallic lithium **12,** 2952
Morphology, probing the accessibility of macroradicals in polypropylene samples of varying - **3,** 792
MWD, the synthesis of polyurethane ureas with a specific - of their rigid segments **11,** 2715

Na^+ ions, complexing of - with polyethylene glycol **7,** 1827
Network formation, gelation and - in polyaddition reactions **8,** 2063
Network formation in polyphosphazenes **2,** 477
Network hydrogels, mechanical properties of - of copolymers of ethylene glycol monomethacrylate **4,** 927
Network polymers, evaluation of the number of trapped entanglements in - **10,** 2468
Network polymers, influence of carborane-containing compounds on the oxidative stability of products of pyrolysis of - **10,** 2453
Networks, the heterogeneous structure of the mutually penetrating - based on an oligo-acrylate and a styrene–butadiene copolymer **1,** 83
NMR analysis, ^1H and ^{13}C - of the structure of chlorinated polyvinyltrimethyl silane **7,** 1684
NMR investigation of the molecular mobility and structure of polysulphone–polybutadiene and polysulphone–polyethylene oxide block copolymers **10,** 2474
NMR spectra, analysis of the ^{19}F - of copolymers of vinylidene fluoride with tetrafluoroethylene, and of vinylidene fluoride with tetrafluoroethylene and hexafluoropropylene. The use of an empirical additive scheme and of the principle of alternation **3,** 711
NMR study, ^{13}C - of the molecular structure of ethylene–propylene copolymers synthesized on supported Ziegler catalysts **5,** 1197
Nonequilibrium copolycondensation, features of the synthesis of copolyarylates by - **11,** 2784
Nuclear magnetic relaxation and the type of distribution of correlation times of segmental motion in rubber **4,** 1042
Nuclear quadrupole resonance, study of molecular motion in chloroprene rubber by -, radiothermoluminescence and dynamic mechanical analysis using a torsion pendulum **8,** 1985

Olefinic bonds, modification of diene polymers and polymer synthesis by reaction of triazolinediones with - **11,** 2587
Oligoarylates, synthesis of branched - **3,** 695

Oligo-isobutylenes, the thermal degradation of - having oxygen-containing end groups 2, 349
Oligomer structure, catalysis of chain transfer and - in radical polymerization of styrene in the presence of cobalt complexes of porphyrins 11, 2807
Oligomer–oligomer systems, crystallization behaviour of - 4, 966
Oligomers, α,ω-bis-(dimethylhydroxysilyl)-substituted cyclodisilazane - 5, 1306
Oligomers, effect of solvents on the adsorption of - by silica gel 7, 1820
Oligomers, on the mechanism of formation of - based on secondary aliphatic-aromatic diols 8, 1957
Oligomers, sulphocation-exchange resin membranes based on - and polymers of diphenyl ether–formaldehyde 5, 1255
Oligoorganosilazoxane, interaction of - with α,ω-dihydrodiorganosiloxanes 8, 1950
Oligo-organovinylsiloxanes, the mechanism of the thermal degradation of copolymers of methyl acrylate with - 2, 358
Oligophenylenes, introduction of organosiloxanes into - by hydrosylylation 7, 1748
Oligosiloxane glycols, synthesis and calorimetric investigation of - and linear polyurethanes based on the latter 10, 2486
Omegatron device, methods and instrument for determining the gas permeability of polymer films over a wide range of temperature and pressure differences using an IPDO-2A - for measuring partial pressures 5, 1313
Optical anisotropy, the - and the rigidity equilibrium of polyamidobenzimidazole molecules in sulphuric acid 11, 2722
Optical generation of charge carriers in polytolane and its complexes with 2,4,7-trinitrofluorenone 1, 232
Optical heterogeneities of poly(acid)amide concentrates 1, 94
Optical rotation, study of the - of dextran solutions containing metal ions 2, 484
Organic media, features of the chain transfer reaction in the polymerization of tetrafluoroethylene in - 11, 2776
Organobi- and organotricyclosiloxanes, calorimetric investigation of the polymerization of - 5, 1187
Organosilazanes, catalytic polycondensation of - 6, 1429
Organo-silicon polymers, effect of thermal prehistory on the glass temperature of - 4, 1002
Organosiloxanes, introduction of - into oligophenylenes by hydrosylylation 7, 1748
Oriented capron monofibres, quantitative treatment of electron micrographs from surfaces of - 1, 33
Oriented films, the structure of - of polyamidoimides and polyester amidiimides 2, 376
Oriented polyethylene, features of the solid-phase oxidation of - 2, 439
Oriented polyethylene, oxidative degradation of polymers under load. Ozone-oxygen action of - 7, 1666
Oriented polyethylene, thermal effects and variation of the density of amorphous regions by elastic stressing of - of different molecular weights 6, 1529
Oxidation, features of the solid-phase - of oriented polyethylene 2, 439
Oxidation, kinetic characteristics of methylene quinones as inhibitors of polypropylene - 1, 163
Oxidation of polyethylene stabilized by a strong phenolic antioxidant 1, 203
Oxidation, the - of polystyrene in solution 11, 2731
Oxidation, the radiothermoluminescence study of the inhibited - of polypropylene 12, 2926
Oxidative degradation, kinetic regularities of the - of solid propylene 5, 1239
Oxidative degradation of polymers under load. Ozone-oxygen action on oriented polyethylene 7, 1666

Oxidative stability, influence of carborane-containing compounds on the - of products of pyrolysis of network polymers 10, 2453
Oxirane copolymerization, mechanisms of - with thiiranes over diethyl zinc-based catalytic systems 10, 2410
Oxygen-containing end groups, the thermal degradation of oligo-isobutylenes having - 2, 349
Oxypropylmethyl cellulose, transformation of - in suspension polymerization of vinyl chloride 4, 997
Ozone, interaction of homo- and copolymers of vinyl chloride and acrylic esters with - 7, 1708
Ozone-oxygen action, oxidative degradation of polymers under load. - on oriented polyethylene 7, 1666

Paramagnetism, influence of gases on the ESR spectra and on the thermoinitiated - of polyacrylonitrile semiconductors 2, 425
Partial pressures, methods and instrument for determining the gas permeability of polymer films over a wide range of temperature and pressure differences using an IPDO-2A omegatron device for measuring - 5, 1313
Permeability, ionites with enhanced - from copolymers of styrene with diisopropenyl derivatives of diphenyl oxide, diphenyl methane and diphenyl 3, 678
Permeability, methods and instrument for determining the gas - of polymer films over a wide range of temperature and pressure differences using an IPDO-2A omegatron device for measuring partial pressures 5, 1313
Peroxide initiator, features of styrene polymerization initiated by - grafted on the Aerosil filler surface 9, 2248
Phase-aggregate state, study of the effect of conditions of synthesis on the - of fluoroalkoxyphosphazene polymers 6, 1538
Phase composition, study of the - of polyethylene terephthalate 11, 2830
Phase equilibrium of polymer systems 12, 3018
Phase equilibrium, structure and - in ethylene–propylene copolymer–methylvinylpyridine complexes with metal halides 11, 2817
Phase equilibrium, the - and rheological properties of solutions of the copolymer of acrylonitrile with methyl methacrylate and vinyl sulphonate in binary solvents 8, 1977
Phase separation in the system polyacrylic acid–polyacrylamide–water 6, 1439
Phase transitions in amorphized rigid and semirigid polymers under heating 10, 2502
Phases, separation of - in aqueous solutions of polyethylene glycol and dextrane 6, 1330
bis-Phenols, crystallization of polyarylates based on - with hexafluoroisopropylidene groups 11, 2792
Phenothiazine–sulphuric acid system, inhibition of the polymerization of methylacrylate by the - 3, 777
Phenyl-(*m*-chlorophenyl)siloxanes, on polycyclic - 8, 1972
***p*-Phenylene diamine,** molecular weight chromatographic analysis of polyamic acids synthesized from - and 3,3′,4,4′-diphenyloxide tetracarboxylic dianhydride 4, 1055
Phenylene-1,3,4-oxadiazol copolymers, the mechanical properties of fibres based on - of various compositions 1, 64
Phenylglycidyl ether, kinetics and mechanism of copolymerization of - with ε-caprolactone by the action of aniline 2, 495
N-Phenyl maleimide, polymerization of glass-like solutions of - in dimethyl formamide (DMF) 8, 1859

Phonon subsystem, effect of a - on the probability of polymer chain breakdown 12, 2991
Photoelastic properties of plasticized polymers in the glassy state 10, 2522
Photo-oxidation of aliphatic polyamides by the action of long-wave UV light 12, 3000
Photooxidation of crosslinked polyurethanes 4, 953
Phthalocyanides, X-ray structural analysis of non-metallic - 6, 1319
Physical impairment, role of - of a polymeric medium during chemicomechanical degradation of triacetylcellulose 2, 431
Physico-chemical study of the reaction of 1,1,5,5-tetraphenyl-3,7-dimethyl-3,7-dihydrocyclotetrasiloxane with 1,1,5,5-tetraphenyl-3,7-dimethyl-3,7-butadiene-cyclotetrasiloxane 6, 1570
Physico-chemical transformations, balance of chemical and - in solutions of polyamic acids on storage 6, 1406
Plasticizers, influence of the structure of phosphate - on their efficiency and compatibility with polymethyl methacrylate 12, 2969
Poly(acid)amide concentrates, optical heterogeneities of - 1, 94
Polyacrylates, structure and properties of polyelectrolyte complexes—products of incomplete reactions betweeen poly-N,N-dimethylaminoethyl methacrylate and polyphosphonates and - 9, 2268
Polyacrylonitrile, the selective effect of the grafted chain length on the isothermal crystallization of immiscible two-component systems based on high-density polyethylene and - 5, 1132
Polyacrylonitrile semiconductors, influence of gases on the ESR spectra and on the thermoinitiated paramagnetism of - 2, 425
Polyaddition reactions, relation and network formation in - 8, 2063
Polyamic acids, balance of chemical and physico-chemical transformations in solutions in solutions of - on storage 6, 1406
Polyamic acids, molecular weight chromatographic analysis of - synthesized from *p*-phenylene diamine and 3,3′,4,4′-diphenyloxide tetracarboxylic dianhydride 4, 1055
Polyamic acids, the mesomorphous state of - 5, 1125
Polyamides, effect of features of electronic structure on properties of rigid-chain aromatic - and fibres based on them 8, 2058
Polyamides, thermal degradation of - and certain heterocyclic polymers in sulphuric acid solutions 3, 591
Polyamidobenzimidazole molecules, the hydrodynamic properties and the rigidity equilibrium in DMA and sulphuric acid of - 9, 2136
Polyamidobenzimidazole molecules, the optical anisotropy and the rigidity equilibrium of - in sulphuric acid 11, 2722
Polyamidoimides, the structure of oriented films of - and polyester amidoimides 2, 376
Polyarimides, the chemical structure and glass transition temperatures of - 2, 409
Polyarylate amides, features of thermal degradation of - 9, 2285
Polyarylate-polydimethylsiloxane, the reversed gas-chromatographic study of the domain structure formed by - block copolymers 2, 366
Polyarylates, association in dilute solutions of polyblock copolymers based on polydimethylsiloxane and - 2, 401
Polyarylates, crystallization of - based on bis-phenols with hexafluoroisopropylidene groups 11, 2792
Polyarylates, low temperature transformations of - containing carborane 10, 2555
Polyarylates, study of molecular weight distribution of - by gel-permeation chromatography and fractionation 9, 2304
Polyaryleneimide chain conformations, machine calculations for - and packing in the

crystalline zones; the combination of the atom–atom potentials method with X-ray structural analysis 10, 2404
Polyaspartimides, the synthesis of - in solution 8, 1929
Polyazine, complex formation between - with a system of conjugated multiple bonds and molecular bromine 5, 1233
Polyblock copolymers, association in dilute solutions of - based on polydimethylsiloxane and polyarylates 2, 401
Polyborodimethylsiloxanes, investigation of the synthesis and hydrolytic degradation of - 6, 1421
Polybutadiene macromolecules, analysis of mechanism of rotational motion of - 4, 976
Polybutylaminophosphazene, synthesis and investigation of - 6, 1465
Polycapramide (PCA), the adsorption properties of polyvinyl chloride (PVC), - and polyvinyl alcohol (PVAL) deformed in adsorption-promoting media 4, 902
Polycaproamide, antiplasticization effect and the state of amorphous regions of - 5, 1301
Polycaproamide, effect of conditions of synthesis on kinetics of structure-formation of - during anionic adiabatic polymerization 10, 2545
Polycarbonate films, mechanical properties and microheterogeneity of blended - 7, 1715
Polycarbonate melts, structural transformations of - in the presence of modifiers 3, 670
Polycarbonate silazasiloxanes 11, 2687
Polycondensation of 4-(ClC_6H_4)X(X=S, SO_2, CO) and (ClC_6H_4)$_2$ monomers under the action of metallic lithium 12, 2952
Polyconjugated system, thermomechanical properties of ethylene-propylene copolymer–acrylonitrile (EPR–PAN) graft copolymers containing a - 4, 941
Polycyclotrimerization, the - of acrylcyanates over $ZnCl_2$ 7, 1647
Polycyclotrimerization, the - of isocyanates 6, 1374
Polycyclotrimerization, the properties of polyisocyanurates produced by the - of aromatic with aliphatic diisocyanates 6, 1381
Polydienes, the mechanism of the light-shielding action of metal dialkyl dithiocarbamates in - 8, 1882
Poly-N,N-dimethylaminoethyl methacrylate, structure and properties of polyelectrolyte complexes—products of incomplete reactions between - and polyphosphates and polyacrylates 9, 2268
Polydimethylsiloxane, association in dilute solutions of polyblock copolymers based on - and polyarylates 2, 401
Polydimethylsiloxanes, the conformations and hydrodynamics of - with cyclic main-chain segments 5, 1109
Polydispersed polymers, main principles of the mutual relation between molecular weight distribution and properties of - 8, 2052
Polydispersity of ethylene–propylene copolymers synthesized on supported Ziegler catalysts 7, 1724
Polyelectrolyte complexes, structure and properties of - —products of incomplete reactions between poly-N,N-dimethylaminoethyl methacrylate and polyphosphates and polyacrylates 9, 2268
Polyelectrolytes, concerning the two types of chemical equilibrium in reactions between - 12, 2881
Polyelectrolytes, hydrophylization of polymer surfaces by synthetic - and their complexes 3, 720
Polyester amidoimides, the structure of oriented films of polyamidoimides and - 2, 376
Polyester urethane ureas, features of self-association of urea groups in - 10, 2446

Polyesters, investigation of functionality inhomogeneity of linear - as components for polyurethane thermoplastics 5, 1221
Polyethylene, features of the solid-phase oxidation of oriented - 2, 439
Polyethylene, kink bands in low-density oriented - 5, 1279
Polyethylene, mechanical relaxation in - with a different thermal prehistory 9, 2128
Polyethylene, oxidation of - stabilized by a strong phenolic antioxidant 1, 203
Polyethylene, relaxation transitions in - 9, 2183
Polyethylene, thermofluctuation rupture of stressed bonds on dissolution of - 10, 2366
Polyethylene, the selective effect of the grafted chain length on isothermal crystallization of immiscible two-component systems based on high-density - and polyacrylonitrile 5, 1132
Polyethylene films, comparison of light-scattering with X-ray diffraction data on spherulite deformation in - 10, 2431
Polyethylene glycol, complexing of Na^+ ions with - 7, 1827
Polyethylene glycol, separation of phases in aqueous solutions of - and dextrane 6, 1330
Polyethylene glycols, study of complex-formation betweena - nd transition metal halides 1, 238
Polyethylene imine, structure of the polymer coil of branched - in solution in the presence of copper (II) ions 9, 2209
Polyethylene–polystyrene blend, rheological properties of a - 1, 50
Polyethylene specimens, anisotropy of mechanical relaxation monotexture - 4, 991
Polyethylene terephthalate, structure and adsorption properties of the material of crazes in glassy - 6, 1350
Polyethylene terephthalate, study of the phase composition of - 11, 2830
Polyfluoroethylenes, on the compatibility of - 1, 149
Polyheteroarylene carboranes, the structural changes in linear - during heat treatment 6, 1364
Poly-(4,4′-hydroxydiphenylene), dynamic birefringence of - pyromellitic amic acid solutions 3, 650
Polyimides containing various heterocyclic main-chain units 8, 1909
Polyimides, influence of unit type inhomogeneity of the thermal stability of - 7, 1732
Polyisobutylene, effect of aromatic hydrocarbons on the process of catalytic depolymerization of - 12, 2875
Polyisocyanurates, the properties of - produced by the polycyclotrimerization of aromatic with aliphatic diisocyanates 6, 1381
Polyisoprene, concentration effects and the determination of additional parameters in gel-chi omatographic analysis of - 3, 798
Polyisoprene, mixtures of metal dithiocarbamates with amino- or phenol-type antioxidants as oxidative degradation inhibitors for - 9, 2157
Polyisoprene rubber, kinetic and mechanism of the thermooxidative degradation of - 2, 419
Poly-bis-maleimidamines, study of thermal degradation of - by thermogravimetry 5, 1266
Poly-bis-maleimideamines, statistical analysis of the results of mechanical tests of standard samples of thermoactive - 7, 1803
Polymer, effect of molecular interactions and molecular mobility on kinetics of breakdown of chemical bonds in a - 7, 1788
Polymer chain breakdown, effect of a phonon subsystem on the probability of - 12, 2991
Polymer chains, frequency dependence of the mechanical loss tangent for a system of two-block - 10, 2349
Polymer chains, local relaxation properties of - containing inclusions 5, 1097
Polymer coil, structure of the - of branched polyethylene imine in solution in the presence of copper (II) ions 9, 2209

Polymer compositions, densely crosslinked - based on various type of dimethacrylates 10, 2438
Polymer crystallosolvates, determining melting points of - by measuring the turbidity of the system 8, 2048
Polymer films, methods and instrument for determining the gas permeability of - over a wide range of temperature and pressure differences using an IPDO-2A omegatron device for measuring partial pressures 5, 1313
Polymer films, rupture of thin - 2, 447
Polymeric liquid crystals, X-ray study of - based on *p*-hydroxy-*p'*-n-amyloxyazobenzene 7, 1692
Polymeric materials, a dynamic method for determining visco-elastic characteristics of - 11, 2839
Polymeric medium, role of physical impairment of a - during chemicomechanical degradation of triacetylcellulose 2, 431
Polymeric products, degradation as a modification method of - . A review 3, 569
Polymerization, butadiene - in the presence of butyl lithium modified with sodium butylate 1, 100
Polymerization, calorimetric investigation of the - of organobi- and organotricyclosiloxane 5, 1187
Polymerization, correlation between sol yield and the degree of conversion in radical-initiated three-dimensional - 2, 471
Polymerization, determination of the dependence of the chain transfer constant of the degree of - by analysis of molecular weight distributions 5, 1169
Polymerization, effect of conditions on kinetics of structure-formation of polycaproamide during anionic adiabatic - 10, 2545
Polymerization, features of the chain transfer reaction in the - of tetrafluoroethylene in organic media 11, 2776
Polymerization, influence of acid complexes of metals of the first transitional series on the - of styrene 10, 2382
Polymerization, inhibition of the - of methylacrylate by the phenothiazine–sulphuric acid system 3, 777
Polymerization, initiation of the - of acrylic acid and sodium acrylate by the hydrogen peroxide–ascorbic acid redox system 11, 2622
Polymerization, IR and electronic spectroscopic study of the structure and - of 9,10-anthraquinodimethane 12, 2933
Polymerization, kinetic parameters for the - of butadiene by certain titanium catalytic systems 1, 57
Polymerization, metal-organic Ti–Al complexes containing phenoxy ligands as catalysts of ethylene - 11, 2766
Polymerization, molecular weight distribution analysis during - of 3-methyl 3-chloromethyloxetane with the catalytic system $Al(iso\text{-}C_4H_9)_3$–H_2O 1, 70
Polymerization of glass-like solutions of N-phenyl maleimide in dimethyl formamide (DMF) 8, 1859
Polymerization, secondary structuring during the - of vinyl chloride 9, 2121
Polymerization, study of - of hexamethylcyclotrisiloxane in the presence of trimethylsilanol 3, 733
Polymerization, the kinetics of the inhibited methacrylic acid - in bulk and in solution 1, 77
Polymerization, the solid-phase high pressure-of - acrylamide initiated by shear strain 8, 1991
Polymerization, the study of the structure and - of the products of pyrolysis of

α,α′-dichloro-*p*-xylene and of α,α′-dibromo-*p*-xylene by electronic and IR spectroscopy 9, 2101
Polymer materials, preliminary evaluation of the thromboresistance of - 8, 2043
Polymer mixture, birefringence of dilute solutions of an incompatible - 2, 511
Polymer mixtures, study of adsorption of - from solutions in a common solvent on a solid surface 11, 2641
Polymer mixtures, viscosity of solutions of incompatible - 4, 934
Polymer networks, high elastic properties of - of inhomogeneous structure 11, 2745
Polymer solutions, a study of relaxational properties of concentrated - by acoustic methods 9, 2081
Polymer surface, adsorption of blood plasma proteins on a hydrophobic - dependent on hydrodynamic conditions 5, 1272
Polymer surfaces, hydrophilization of - by synthetic polyelectrolytes and their complexes 3, 720
Polymer synthesis, modification of diene polymers and - by reaction of triazolinediones with olefinic bonds 11, 2587
Polymer systems, phase equilibrium of - 12, 3018
Polymers, a study of carbon black distribution in - by the electron microscopy method 6, 1325
Polymers, a study of intermolecular interaction in aqueous solutions of - and cationic surfactants by polarized luminescence 6, 1356
Polymers, calculation of the surface energy of - from their refractometric and cohesive properties 4, 848
Polymers, effect of the type of sorbate on the Gibbs energy of mixing of - calculated from data of static sorption 9, 2311
Polymers, excluding the influence of concentration effects when calculating molecular weight distributions of - using rapid sedimentation data 11, 2824
Polymers, features of cold-drawing - in two-component adsorption-promoting media 5, 1146
Polymers, fracture of - in brittle and quasi-brittle states 4, 1011
Polymers, influence of the degree of monolithization of the mechanical relaxation properties of - 6, 1446
Polymers, liquid–glass structural transition in the formation of densely crosslinked epoxyamide networks. Effect of transition on properties of - 10, 2564
Polymers, longitudinal deformation and rupture of linear flexible-chain - 12, 2847
Polymers, micro-column exclusion chromatography of - 1, 263
Polymers, on the influence of the chemical structure of - on their thermal stability 9, 2194
Polymers, on the influence of the unit type inhomogeneity of - on their thermal characteristics 9, 2234
Polymers, on the problem of link diversity in - of acetyl derivatives of ferrocene 4, 873
Polymers, oxidative degradation of - under load. Ozone-oxygen action on oriented polyethylene 7, 1666
Polymers, phase transitions in amorphized and semirigid - under heating 10, 2502
Polymers, photoelastic properties of plasticized - in the glassy state 10, 2522
Polymers, rapid method for the evaluation of the degree of branching of - 3, 803
Polymers, recording relaxation transitions in - by the simultaneous measurement of radiothermoluminescence and the current of thermostimulated depolarization 1, 255
Polymers, relationship between the melting point and the crystalline structure of - 9, 2255
Polymers, relaxation nature and regularities of breakdown of crosslinked and non-crosslinked - in the high-elastic state 6, 1554

Polymers, relaxation nature of thermal degradation of - 5, 1293
Polymers, simulation of the effect of continuous "tie chains" on mobility in partially crystalline - 1, 218
Polymers, simulation of the role of continuous "tie chains" in partially crystalline - 1, 210
Polymers, study of the effect of conditions of synthesis on the phase-aggregate state of fluoroalkoxyphosphazene - 6, 1538
Polymers, study of the structure and properties of - of vinylacetylene alcohols 12, 2986
Polymers, sulphocation-exchange resin membrane based on oligomers and - of diphenyl ether–formaldehyde 5, 1255
Polymers, synthesis and properties of carbosiloxane of - cyclo-linear structure 3, 703
Polymers, synthesis and study of - based on tetranitriles of tetracarboxylic acids, triaminobenzenes and bis-(*o*-cyanamines) 5, 1248
Polymers, the influence of temperature conditions in the preparation of polyurethanes on branching and properties of the - 11, 2737
Polymers, the structure-sensitive viscoelastic characteristics of - 8, 1866
Polymers with diphenyl fragments in branches having a crystalline and liquid crystalline structure 9, 2147
Polymethyl methacrylate, influence of the structure of phosphate plasticizers on their efficiency and compatibility with - 12, 2969
Poly-4-methyl-1-pentene, influence of stabilizers of thermooxidative degradation of - on its viscoelastic properties 6, 1413
Polymethylphenyl siloxane, synthesis and properties of star-shaped - 6, 1562
Poly-α-methylstyrene, diffusion and sedimentation of - in cyclohexane 9, 2113
Polynaphthoylene benzimidazoles, degradation of - 1, 108
Polynaphthoylene benzimidazoles, synthesis of - based on dianhydrides of keto- and sulphone-bis-(4,5-dicarboxy-1-naphthyl) 7, 1753
Polynaphthoylenebenzimidazoles, the stepwise synthesis of - 8, 1902
Polyolefin blends, a possible mechanism for the formation of - 2, 839
Polyolefines, influence of ionizing irradiation on the electrical strength of - and their blends with elastomers 7, 1742
Polyolefins, strength and type of breakdown of adhesive compounds for - with metal and glass 3, 746
Polyolefins with metal and glass, strength and type of breakdown of adhesive compounds for - 3, 746
Polyorganosiloxanes, hydrolytic stability of - as a function of their structure 3, 606
Polyoxyamides, IR spectroscopy for quantitative determinations of the structural unit heterogeneity of carborane-containing - 1, 155
Polyoxymethylene, the interaction of high-density polyethylene in blends with - 8, 1894
Poly-*p*-phenylene-1,3,4-oxadiazole, the supermolecular structure changes in fibres based on - during pyrolysis 6, 1398
Poly-*p*-phenylene terephthalamides, determining end groups in - 1, 258
Polyphenylene-type polymers, the synthesis and study of - based on the ethylketals of diacetylarylenes and acetyldiphenylyl-*o*-carborane 7, 1612
Polyphenylquinoxalines, degradation and spontaneous ignition studies of brominated - 4, 884
Polyphenyl siloxane, the sedimentation-diffusion and viscometric analysis of the conformation properties and molecular rigidity of ladder-like - in solution 11, 2705
Polyphenylsilsesquioxanes, origin and morphology of structural forms of mono-, oligo- and - 9, 2317
Polyphosphates, structure and properties of polyelectrolyte complexes—products

Polyvinyl alcohol films, fluorescence quenching by bromide ions of the acridinium cation in - 8, 1915
Poly-N-vinylamides, study of the mechanism of complex-formation in dilute solutions of - with the I_3^- ion 2, 490
Polyvinyl butyral (PVB), thermal conductivity study of the boundary layer in filled polyvinyl chloride (PVC) and - 7, 1652
Polyvinyl chloride, change in the structural state and viscoelastic properties of plasticized - under heat treatment 10, 2509
Polyvinylchloride, correlations between the chemical structure and the thermal stability of - . A review 3, 535
Polyvinylchloride, the nature of the boundary layer between - and a filler surface 1, 41
Polyvinylchloride, thermodynamics of high-elastic deformation of filled - 1, 181
Polyvinylchloride, the structure of filled compositions based on - 9, 2106
Polyvinyl chloride (PVC), the adsorption properties of - , polycapramide (PCA) and polyvinyl alcohol (PVAL) deformed in adsorption-promoting media 4, 902
Polyvinylchloride films, diffusion of benzene, toluene and styrene in - 8, 2006
Polyvinylchloride stabilization methods. A review 3, 552
Poly-4-vinyl-N-ethylpyridinium bromide, effect of the ionic strength and pH of the medium on the bahaviour of complexes formed by bovine serum albumin with - in aqueous solutions 2, 280
Poly-4-vinyl-N-ethylpyridinium bromide, study of the structure of water-soluble complexes of bovine serum albumin with by light scattering 6, 1512
Poly-4-vinylpyridine, soluble ternary complex of - , bovine serum albumin and copper 2, 299
Poly-4-vinylpyridines, interaction of sols of polysilicic acid with quaternized - 10, 2529
Poly-4-vinylpyridnium cations, soluble complexes of bovine serum albumin with - containing *N*-cetyl side radicals 2, 287
Polyvinylpyridinium salts, charge transfer complexes and dipole–dipole association in - 1, 224
Poly-N-vinylpyrrolidone, infrared analysis of the hydration of - 1, 168
Polyvinyltrimethyl silane, ^1H and ^{13}C NMR analysis of the structure of chlorinated - 7, 1684
Poly-*p*-xylene films, some mechanical properties of - obtained from gaseous phase 5, 1215
Porous structure, features of - of macroporous low-basicity anion-exchange resins based on ethylene diamine 8, 2031
Porphyrins, catalysis of chain transfer and oligomer structure in radical polymerization of styrene in the presence of cobalt complexes of - 11, 2807
Positronium decay in hydrocarbons of large molecular weight 7, 1631
Postpolymerization, radiation-induced - of solid methyl acrylate 7, 1797
Pressure, effect of temperature, solvent composition and - on the adsorption and chromatography of polystyrene on macroporous glasses 2, 304
Pressures, glass transition in filled polystyrene at elevated - 1, 130
Properties of ethylene–vinylsilane copolymers and their variation after irradiation 3, 785
Properties, synthesis and some - of isomeric co-oligophenylenesulphides 3, 769
Properties, the influence of temperature conditions in the preparation of polyurethanes on branching and - of the polymers 11, 2737
***β*-Priopiolactone,** copolymerization of conidine and - 11, 2800
Propylene, factors affecting the molecular weight in the alternating copolymerization of butadiene with - over the $TiCl_4$–$CH_3COC_6H_5$–$Al(iso\text{-}C_4H_9)_3$ catalyst system 10, 2426

of incomplete reactions between poly-N,N-dimethylaminoethyl methacrylate and - and polyacrylates 9, 2268
Polyphosphazenes, network formation in - 2, 477
Polypropylene, influence of the orientation of - in liquid media on its sorption properties 4, 986
Polypropylene, kinetic regularities of the oxidative degradation of solid - 5, 1239
Polypropylene, radiation-chemical oxidation of - in the presence of 2,2′-methylene-bis-(4-methyl-6-tert.butylphenol) 3, 617
Polypropylene, structural changes in shrinkable fibres of modified - 1, 14
Polypropylene, synthesis and study of - consisting of different units and containing deuterated units 12, 3027
Polypropylene, the radiothermolumin escence study of the inhibited oxidation of - 12, 2926
Polypropylene, the sorption of low molecular weight substances by atactic - 12, 2919
Polypropylene oxidation, kinetic characteristics of methylene quinones as inhibitors of - 1, 163
Polypropylene samples, probing the accessibility of macroradicals in - of varying morphology 3, 792
Polysaccharides, investigation of complex formation between soluble carboxymethyl ethers of - and proteins 8, 1999
Polysilicic acid, interaction of sols of - with quaternized poly-4-vinylpyridines 10, 2529
Polystyrene, chemical bond formation between poly-1,1,2-trichlorobuta-1,3-diene and - by the Friedel–Crafts reaction 5, 1116
Polystyrene, effect of the type of solvenr on properties of graft copolymer solutions of cellulose diacetate with - and their mixtures 3, 756
Polystyrene, the oxidation of - in solution 11, 2731
Polystyrenes, effect of temperature, solvent composition and pressure on the adsorption and chromatography of - on macroporous glasses 2, 304
Polytolane, optical generation of charge carriers in - and its complexes with 2,4,7-trinitrofluorenone 1, 232
Poly-1,1,2-trichlorobuta-1,3-diene, chemical bond formation between - and polystyrene by the Friedel–Crafts reaction 5, 1116
Polyurethane elastomers, on the inversion of IR dichroism in segmented - 11, 2679
Polyurethane thermoplastics, investigation of functionality inhom ogeneity of linear polyesters as components for - 5, 1221
Polyurethane–tin dibutyl dilaurate system, catalytic activity of a - in the synthesis of three-dimensional elastomers 3, 763
Polyurethane ureas, the synthesis of - with a specific MWD of their rigid segments 11, 2715
Polyurethanes, effect of a filler on the formation of network - 3, 624
Polyurethanes, effect of surface-active substances on the formation of crosslinked - 6, 1504
Polyurethanes prepared from oxypropylated lignin 1, 141
Polyurethanes, the diffusion of water vapour in linear - 4, 822
Polyurethanes, the influence of temperature conditions in the preparation of - on branching and properties of the polymers 11, 2737
Polyvinyl acetate, on the role of solvents in the alkaline alcoholysis of - 8, 1944
Polyvinyl alcohol, calculation of regular macromolecular conformations of - 7, 1760
Polyvinyl alcohol (PVA), the influence of molecular mass, acetate group content and synthesis method on the structuring of - in aqueous solutions 6, 1344
Polyvinyl alcohol (PVAL), the adsorption properties of polyvinyl chloride (PVC), polycapramide (PCA) and - deformed in adsorption-promoting media 4, 902

Propylene, the donor type and its effect on the alternating copolymerization of butadiene with - over the $TiCl_4$–$Al(iso\text{-}C_4H_9)_3$ catalyst system **10,** 2418
Propylene oxide, on the isomerization of - during tetrahydrofuran polymerization by the catalyst system BF_3–propylene oxide **12,** 2964
Proteins, adsorption of blood plasma - on a hydrophobic polymer surface dependent on hydrodynamic conditions **5,** 1272
Proteins, investigation of complex formation between soluble carboxymethyl ethers of polysaccharides and - **8,** 1999
Pyrolysis, influence of carborane-containing compounds on the oxidative stability of products of - of network polymers **10,** 2453
Pyrolysis, the study of the structure and polymerization of the products of - of α,α′-dichloro-*p*-xylene and of α,α′-dibromo-*p*-xylene by electronic and IR spectroscopy **9,** 2101
Pyrolysis, the supermolecular structure changes in fibres based on poly-*p*-phenylene-1,3,4-oxadiazole during - **6,** 1398
Pyropolymers, temperature dependence of jump electrical conductivity of semiconductor - **10,** 2390

Qualitative and quantitative analysis of random copolymers and homopolymer blends by pyrolytic gas chromatography **11,** 2696
Quantitative determinations, IR spectroscopy for - of the structural unit heterogeneity of carborane-containing polyoxyamides **1,** 155
Quantitative determination of the vinylthio groups in divinyl sulphide copolymers by IR and UV spectroscopy **7,** 1845
Quantitative treatment of electron micrographs from fracture surfaces of oriented capron monofibres **1,** 33

Radiation graft copolymerization of a binary mixture of 4-vinylpyridine and diethylaminoethylmethacrylate **4,** 832
Radiation-chemical oxidation of polypropylene in the presence of 2,2′-methylene-bis-(4-methyl-6-tert.butylphenol) **3,** 617
Radiation-grafted polyethylene films, diffusion in "barrier" layers of - **8,** 1889
Radical copolymerization, a study of the steric effect in the - of *para*-substituted stilbenes with styrene **2,** 323
Radical copolymerization, on the mechanism of - of maleic anhydride with *trans*-stilbene **3,** 689
Radical polymerization, catalysis of chain transfer and oligomer structure in - of styrene in the presence of cobalt complexes of porphyrins **11,** 2807
Radical polymerization, features of - in alcohols of vinylpyridinium salts, varying the hydrophylic/probic balance **4,** 947
Radical polymerization, influence of the conditions of synthesis on the branching of oligomers synthesized by radical - **10,** 2460
Radical polymerization, kinetic study of catalysis of the chain transfer reaction to monomer in the - of methyl methacrylate **5,** 1158
Radical polymerization, on the gel-effect mechanism in - **8,** 1873
Radical polymerization, the determination of the rate constants of the main - reactions at large monomer conversions **7,** 1603
Radiotermoluminescence, recording relaxation transitions in polymers by the simultaneous measurement of - and the current of thermostimulated-depolarization **1,** 255

Radiothermoluminescence study, the - of the inhibited oxidation of polypropylene 12, 2926
Rapid method for the evaluation of the degree of branching of polymers 3, 803
Reaction, physico-chemical study of the - of 1,1,5,5-tetraphenyl-3,7-dimethyl-3,7-dihydrocyclotetrasiloxane with 1,1,5,5-tetraphenyl-3,7-dimethyl-3,7-butadienecyclotetrasiloxane 6, 1570
Reaction conditions, the link between the mechanical properties produced by thermal imidization of poly-(*p*,*p'*-diphenylenoxy)-pyromellitic amic acid and the - 4, 915
Reactions, concerning the two types of chemical equilibrium in - between polyelectrolytes 12, 2881
Reactivity, on enhancing the - of supported Ziegler catalysts in elementary steps of ethylene polymerization with inert supports modified by a magnesium compound 6, 1458
Relaxation, anisotropy of mechanical - in monotextured polyethylene specimens 4, 991
Relaxation, nuclear magnetic - and the type of distribution of correlation times of segmental motion in rubber 4, 1042
Relaxation nature and regularities of breakdown of crosslinked and non-crosslinked polymers in the high-elastic state 6, 1554
Relaxation nature of thermal degradation of polymers 5, 1293
Relaxation processes in elastomers at low strains from the data of relaxation spectrometry, sress-strain and thermomechanical curves 2, 313
Relaxation properties, influence of the degree of monolithization on the mechanical - of polymers 6, 1446
Relaxation properties, local - of polymer chains containing inclusions 5, 1097
Relaxation times, appearance of individual spectra of - 6, 1492
Relaxation transitions and internal friction spectra 6, 1479
Relaxational transitions in crosslinked ethylene-propylene elastomers 8, 2012
Relaxation transitions in polyethylene 9, 2183
Relaxation transitions, on the high temperature - in butadiene-nitrile elastomers 12, 2941
Relaxation transitions, recording - in polymers by the simultaneous measurement of radiothermoluminescence and the current of thermostimulated depolarization 1, 255
Relaxational properties, a study of - of concentrated polymer solutions by acoustic methods 9, 2081
Resin membranes, sulphocation-exchange - based on oligomers and polymers of diphenyl ether–formaldehyde 5, 1255
Resins, feature of porous structure of macroporous low-basicity anion-exchange - based on ethylene diamine 8, 2031
Resins, synthesis and investigation of the properties of organosilicon anion-exchange - 11, 2671
Resistance to deformation and intermolecular interaction in glassy polymers 5, 1071
Rheokinetics of anionic polymerization of caprolactam 6, 1471
Rheological properties of a polyethylene–polystyrene blend 1, 50
Rheological properties, study of - of dilute and moderately concentrated solutions of chitosan 6, 1546
Rheological properties, the phase equilibrium and - of solutions of the copolymer of acrylonitrile with methyl methacrylate and vinyl sulphonate in binary solvents 8, 1977
Rigid segments, the synthesis of polyurethane ureas with a specific MWD of their - 11, 2715
Rigidity, flow birefringence and - of molecules of aromatic copolyamides of *para*-structure 10, 2375
Rigidity equilibrium, the flow birefringence and - of *p*- and *m*-aromatic copolyamide molecules 12, 2908

Rigidity equilibrium, the optical anisotropy and the - of polyamidobenzimidazole molecules in sulphuric acid 11, 2722
Rigidity equilibrium in DMA, the hydrodynamic properties and the - and sulphuric acid of polyamidobenzimidazole molecules 9, 2136
Rotational motion, analysis of mechanisms of - of polybutadiene macromolecules 4, 976
Rubber, effect of strain of dielectric relaxation in filled - 11, 2655
Rubber, kinetics and mechanism of the thermooxidative degradation of polyisoprene - 2, 419
Rubber, nuclear magnetic relaxation and the type of distribution of correlation times of segmental motion in - 4, 1042
Rubber, study of molecular motion in chloroprene - by nuclear quadrupole resonance, radiothermoluminescence and dynamic mechanical analysis using a torsion pendulum 8, 1985
Rupture, autoionization mechanism of the - of chemical bonds in macromolecules 3, 741
Rupture, longitudinal deformation and - of linear flexible-chain polymers 12, 2847
Rupture of linear polybutadiene in liquid media above the glass temperature 9, 2215
Rupture of thin polymer films 2, 447
Rupture of chemical bonds, autoionization mechanism of the - in macromolecules 3, 741

Salts, charge transfer complexes and dipole–dipole association in polyvinylpyridinium - 1, 224
Salts, features of radical polymerization in alcohols of vinylpyridinium - , varying the hydrophilic/probic balance 4, 947
Schultz heterogeneity coefficients, determining average weights and - for narrow dispersed polymers using gel permeations chromatography allowing for instrument widening without the use of computers 2, 517
Secondary structuring during the polymerization of vinyl chloride 9, 2121
Sedimentation, diffusion and - of poly-α-methylstyrene in cyclohexane 9, 2113
Sedimentation data, excluding the influence of concentration effects when calculating molecular weight distributions of polymers using rapid - 11, 2824
Sedimentation-diffusion and viscometric analysis, the - of the conformation properties and molecular rigidity of ladder-like polyphenyl siloxane in solution 11, 2705
Segmental motion, nuclear magnetic relaxation and the type of distribution of correlation times of - in rubber 4, 1042
Self-association, features of - of urea groups in polyester urethane ureas 10, 2446
Semiconductor pyropolymers, temperature dependence of jump electrical conductivity of - 10, 2390
Semiconductors, influence of gases on the ESR spectra and on the thermoinitiated paramagnetism of polyacrylonitrile - 2, 425
Separation of phases in aqueous solutions of polyethylene glycol and dextrane 6, 1330
Serum albumin, study of the structure of water-soluble complexes of bovine - with poly-4-vinyl-N-ethylpyridinium bromide by light scattering 6, 1512
Shear strain, the solid-phase high-pressure polymerization of acrylamide initiated by - 8, 1991
Side chain formation, kinetics of the variation of molecular weight distribution in branched radical polymerization and its relation with processes of - 12, 3009
Silica gel, effect of solvents on the adsorption of oligomers by - 7, 1820
Simulation of the effect of continuous "tie chains" on mobility in partially crystalline polymers 1, 218

Simulation of the role of continuous "tie chains" in partially crystalline polymers 1, 210
Sodium acrylate, initiation of the polymerization of acrylic acid and - by the hydrogen peroxide–ascorbic acid redox system 11, 2622
Sodium butylate, butadiene polymerization in the presence of butyl lithium modified with - 1, 100
Solid methyl acrylate, radiation-induced postpolymerization of - 7, 1797
Solid-phase oxidation, features of the - of oriented polyethylene 2, 439
Solid surface, study of adsorption of polymer mixtures from solutions in a common solvent on a - 11, 2641
Sols of polysilicic acid, interaction of - with quaternized poly-4-vinylpyridines 10, 2529
Soluble carboxymethyl ethers, investigation of complex formation between - of polysaccharides and proteins 8, 1999
Soluble complexes of bovine serum albumin with poly-4-vinylpyridinium cations containing *N*-cetyl side radicals 2, 287
Soluble ternary complex of poly-4-vinylpyridine, bovine serum albumin and copper 2, 299
Solutions, balance of chemical and physico-chemical transformations in - of polyamic acids on storage 6, 1406
Solutions, dynamic birefringence of - of flexible-chain polymers 7, 1778
Solutions, viscosity of - of incompatible polymer mixtures 4, 934
Solutions of chitosan, study of rheological properties of dilute and moderately concentrated - 6, 1546
Solvent, effect of the type - of on properties of graft copolymer solutions of cellulose diacetate with polystyrene and their mixtures 3, 756
Solvent, study of adsorption of polymer mixtures from solutions in a common - on a solid surface 11, 2641
Solvent composition, effect of temperature, - and pressure on the adsorption and chromatography of polystyrenes on macroporous glasses 2, 304
Solvents, effect of - on the adosrption of oligomers by silica gel 7, 1820
Solvents, homopolymerization of diethylaminoethyl methacrylate acetate and copolymerization with N-vinylpyrrolidone in various - 8, 2019
Solvents, on the role of - in the alkaline alcoholysis of polyvinyl acetate 8, 1944
Solvents, the phase equilibrium and rheological properties of solutions of the copolymer of acrylonitrile with methyl methacrylate and vinyl sulphonate in binary - 8, 1977
Solvents, the special role of - in some systems based on aromatic polyamides 9, 2278
Sol yield, correlation between - and the degree of conversion in radical-initiated three-dimensional polymerization 2, 471
Sorbate, effect of the type of - on the Gibbs energy of mixing of polymers calculated from data of static sorption 9, 2311
Sorption of methanol in the system methanol–polymethylmethacrylate 6, 1338
Sorption, the - of low molecular weight substances by atactic polypropylene 12, 2919
Sorption properties, influence of the orientation of polypropylene in liquid media on its - 4, 986
Spectroscopic determination of the composition of bisulphite derivatives of copolymers of acrolein with acrylic acid 7, 1842
Spectroscopy, quantitative determination of the vinylthio groups in divinyl sulphide copolymers by IR and UV - 7, 1845
Spectroscopy, relaxation processes in elastomers at low strains from the data of relaxation - , stress-strain and thermomechanical curves 2, 313

Spherulite deformation, comparison of light-scattering with X-ray diffraction data on - in polyethylene films 10, 2431
Spin probe investigation of triethylene glycol dimethacrylate polymers 12, 2980
Spin-probe study, a - of molecular mobility in modified epoxy resins 4, 922
Spontaneous ignition, degradation and - studies of brominated polyphenylquinoxalines 4, 884
Stability of "live" polymers in tetrahydrofuran in the presence of α-methylstyrene 12, 3032
Stabilizers, influence of - of thermooxidative degradation of poly-4-methyl-1-pentene on its viscoelastic properties 6, 1413
Stabilizing effect, the mechanism of the - of thiacyclanes 3, 601
Static sorption, effect of the type of sorbate on the Gibbs energy of mixing of polymers calculated from data of - 9, 2311
Statistical analysis of the results of mechanical tests of standards samples of thermoreactive poly-bis-maleimideamines 7, 1803
Steric effect, a study of the - in the radical copolymerization of *para*-substituted stilbenes with styrene 2, 323
Stilbene, study of the temperature dependence of the copolymerization constants for - with styrene and acenaphthylene 1, 136
Stilbenes, a study of the steric effect in the radical copolymerization of *para*-substituted - with styrene 2, 323
Strain, effect of - on dielectric relaxation in filled rubber 11, 2655
Strains, relaxation processes in elastomers at low - from the data of relaxation spectrometry, stress–strain and thermomechanical curves 2, 313
Strength and type of breakdown of adhesive compounds for polyolefins with metal and glass 3, 746
Strength, temperature dependence of bonding - in epoxy resin–fibre systems 1, 123
Stress, conformational changes in crystalline polycaproamide caused by - 4, 857
Stress relaxation, the effects of temperature, pressure and volume on the - properties of low density polyethylene (LDPE) 7, 1593
Stressed bonds, thermofluctuation rupture of - on dissolution of polyethylene 10, 2366
Stress-strain and thermomechanical curves, relaxation processes in elastomers at low strains from the data of relaxation spectrometry, - 2, 313
Structural changes in shrinkable fibres of modified polypropylene 1, 14
Structural changes, the - in linear polyheteroarylene carboranes during heat treatment 6, 1364
Structural forms, origin and morphology of - mono-, oligo- and polyphenylsilsesquioxanes 9, 2317
Structural state, change in the - and viscoelastic properties of plasticized polyvinyl chloride under heat treatment 10, 2509
Structural transformations of polycarbonate melts in the presence of modifiers 3, 670
Structure, ^{13}C NMR investigation of the - of aliphatic copolyamides 7, 1659
Structure, ^{1}H and ^{13}C NMR analysis of the - of chlorinated polyvinyltrimethyl silane 7, 1684
Structure and adsorption properties of the material of crazes in glassy polyethylene terephthalate 6, 1350
Structure and phase equilibrium in ethylene–propylene copolymer–methylvinylpyridine complexes with metal halides 11, 2817
Structure and properties of polyelectrolyte complexes—products of incomplete reactions between poly-N,N-dimethylaminoethyl methacrylate and polyphosphates and polyacrylates 9, 2268

Structure, influence of crystallization on the - and adsorption properties of glassy polyethylene terephthalate strained in an adsorption-active medium **5,** 1178
Structure, influence of the - of phosphate plasticizers on their efficiency and compatibility with polymethyl methacrylate **12,** 2969
Structure, investigation of the - and thermodynamic parameters of interaction of components in plasticized cellulose nitrates **6,** 1452
Structure, investigation of the influence of ionizing irradiation on the - of copolymers of ethylene with vinylsilanes **1,** 114
Structure, IR and electronic spectroscopic study of the - and polymerization of 9,10-anthraquinodimethane **12,** 2933
Structure, NMR investigation of the molecular mobility and - of polysulphone–polybutadiene and polysulphone–polyethylene oxide block copolymers **10,** 2474
Structure of concentrated solutions of cellulose triacetate in methylenechloride and acetic acid **5,** 1082
Structure of the polymer coil of branched polyethylene imine in solution in the presence of copper (II) ions **9,** 2209
Structure, on the - of branched polymers of diallyl esters **8,** 1965
Structure, study of the - of water-soluble complexes of bovine serum albumin with poly-4-vinyl-N-ethylpyridinium bromine by light scattering **6,** 1512
Structure, synthesis and properties of carbosiloxane polymers of cyclo-linear - **3,** 703
Structure, the - of filled compositions based on polyvinylchloride **9,** 2106
Structure, the - of oriented films of polyamidoimides and polyester amidoimides **2,** 376
Structure and properties, study of the - of polymers of vinylacetylene alcohols **12,** 2986
Structure formation in macromolecules of triblock copolymers **12,** 2893
Styrene, a study of the steric effect in the radical copolymerization of *para*-substituted stilbenes with - **2,** 323
Styrene, catalysis of chain transfer and oligomer structure in radical polymerization of - in the presence of cobalt complexes of porphyrins **11,** 2807
Styrene, diffusion of benzene, toluene and - in polyvinylchloride films **8,** 2006
Styrene, influence of acid complexes of metals of the first transitional series on the polymerization of - **10,** 2382
Styrene, ionites with enhanced permeability from copolymers of - with diisopropenyl derivatives of diphenyl oxide, diphenyl methane and diphenyl **3,** 678
Styrene, kinetic study of the chain propagation mechanism in the alternating copolymerization of - with methyl methacrylate over diethyl aluminium chloride **9,** 2174
Styrene, study of the properties of dilute solutions of terpolymers of - with acrylonitrile and methyl methacrylate **3,** 657
Styrene, study of the temperature dependence of the copolymerization constants for stilbene with - and acenaphthylene **1,** 136
Styrene–butadiene copolymer, the heterogeneous structure of the mutually penetrating networks based on an oligo-acrylate and a - **1,** 83
Styrene copolymer, study of the properties and conformations in solution of a - with maleic mono N,N-diethylaminopropylamide **11,** 2628
Styrene polymerization, features of - initiated by peroxide initiators grafted on the Aerosil filler surface **9,** 2248
Sulphuric acid, kinetics and mechanism of cationic polymerization of epichlorhydrin in the presence of - **4,** 1035
Sulphuric acid, the hydrodynamic properties and the rigidity equilibrium in DMA and - of polyamidobenzimidazole molecules **9,** 2136

Sulphuric acid, the optical anisotropy and the rigidity equilibrium of polyamidobenzimidazole molecules in - 11, 2722
Sulphuric acid solutions, thermal degradation of polymers and certain heterocyclic polymers in - 3, 591
Supermolecular structure, the - changes in fibres based on poly-*p*-phenylene-1,3,4-oxapiazole during pyrolysis 6, 1398
Supermolecular structures, techniques of revealing - of amorphous bulk polymers 8, 2037
Surface-active substances, effect of - on the formation of crosslinked polyurethanes 6, 1504
Surface energy, calculation of the - of polymers from their refractometric and cohesive properties 4, 848
Surtface oxidation study on a polyethylene melt 7, 1617
Suspension polymerization, transformations of oxypropylmethyl cellulose in - of vinyl chloride 4, 997
Synthesis and investigation of metal-containing cardic polymers 10, 2494
Synthesis and investigation of polybutylaminophosphazene 6, 1465
Synhesis and properties of carbosiloxane polymers of cyclo-linear structure 3, 703
Synthesis and some properties of isomeric co-oligophenylenesulphides 3, 769
Synthesis and calorimetric investigation of oligosiloxane glycols and linear polyurethanes based on the latter 10, 2486
Synthesis and investigation of the properties of organosilicon anion-exchange resins 11, 2671
Synthesis and properties of star-shaped polymethylphenyl siloxane 6, 1562
Synthesis and study of polymers based on tetranitriles of tetracarboxylic acids, triaminobenzenes and bis-(*o*-cyanamines) 5, 1248
Synthesis and study of polypropylene consisting of different units and containing deuterated units 12, 3027
Synthesis, effect of conditions of - on kinetics of structure-formation of polycaproamide during anionic adiabatic polymerization 10, 2545
Synthesis, features of the - of copolyarylates by nonequilibrium copolycondensation 11, 2784
Synthesis, influence of the conditions of - on the branching of oligomers synthesized by radical polymerization 10, 2460
Synthesis, investigation of the - and hydrolytic degradation of polyborodimethylsiloxanes 6, 1421
Synthesis of bioresistant polymers and block copolymers using initiating systems based on mixed metalorganic compounds of mercury, tin and lead 3, 643
Synthesis of branched oligoarylates 3, 695
Synthesis of polynaphthoylene benzimidazoles based on dianhydrides of keto- and sulphone-bis-(4,5-dicarboxy-1-naphthyl) 7, 1753
Synthesis, study of the effect of conditions of - on the phase-aggregate state of fluoroalkoxyphosphazene polymers 6, 1538
Synthesis, the - and study of polyphenylene-type polymers based on the ethylketals of diacetylarylenes and acetyldiphenylyl-*o*-carborane 7, 1612
Synthesis, the - of polyaspartimides in solution 8, 1929
Synthesis, the - of polyurethane ureas with a specific MWD of their rigid segments 11, 2715
Synthesis, the stepwise - of polynaphthoylene benzimidazoles 8, 1902
Synthesis method, the influence of molecular mass, acetate group content and - on the structuring of polyvinyl alcohol (PVA) in aqueous solutions 6, 1344
Synthetic macromolecules, study of segmental mobility of spin-labelled-in solutions 6, 1581
System, frequency dependence of the mechanical loss tangent for a - of two-block polymer chains 10, 2349

System Co^{2+}–polyethylenimine, special features of complex formation in the - 2, 270
System methanol–polymethylmethacrylate, sorption of methanol in the - 6, 1338
System polyacrylic acid–polyacrylamide–water, phase separation in the - 6, 1439

Temperature, effect of - , solvent composition and pressure on the adsorption and chromatography of polystyrenes on macroporous glasses 2, 304
Temperature conditions, the influence of - in the preparation of polyurethanes on branching and properties of the polymers 11, 2737
Temperature dependence of bonding strength in epoxy resin–fibre systems 1, 123
Temperature dependence of jump electrical conductivity of semiconductor pyropolymers 10, 2390
Temperature dependence, study of the - of the copolymerization constants for stilbene with styrene and acenaphthylene 1, 136
Tetracarboxylic acids, synthesis and study of polymers based on tetranitriles of - , triaminobenezenes and bis-(*o*-cyanamines) 5, 1248
Tetrahydrofuran, stability of "live" polymers in - in the presence of α-methylstyrene 12, 3032
Tetrahydrofuran homopolymerization, study of the mechanism of - with the catalyst system BF_3 + oxypropylene based on the MWD data 4, 889
Tetrahydrofuran polymerization, on the isomerization of propylene oxide during - by the catalyst system BF_3–propylene oxide 12, 2964
Terpolymers, study of the properties of dilute solutions of - of styrene with acrylonitrile and methyl methacrylate 3, 657
Tetranitriles, synthesis and study of polymers based on - of tetracarboxylic acids, triaminobenzenes and bis-(*o*-cyanamides) 5, 1248
Thermal, acid-hydrolytic and enzymatic degradation of cellulose 1, 1
Thermal and thermal oxidative degradation of crosslinked polymers based on epoxides and aromatic amines 12, 3040
Thermal degradation, features of - of polyarylate amides 9, 2285
Thermal degradation of copolymers of vinyl chloride with vinyl acetate 7, 1675
Thermal degradation of polymers and certain heterocyclic polymers in sulphuric acid solutions 3, 591
Thermal degradation, special aspects of the - of copolymers of vinyl chloride with methyl acrylate 7, 1809
Thermal degradation, study of - of poly-bis-maleimidamines by thermogravimetry 5, 1266
Thermal degradation, the mechanism of the - of copolymers of methyl acrylate with oligo-organovinylsiloxanes 2, 358
Thermal degradation, the - of oligo-isobutylenes having oxygen-containing end groups 2, 349
Thermal effects and variation of the density of amorphous regions by elastic stressing of oriented polyethylene of different molecular weight 6, 1529
Thermal imidization, the link between the mechanical properties produced by - of poly-(*p,p'*-diphenylenoxy)-pyromellitic amic acid and the reaction conditions 4, 915
Thermal stability, correlations between the chemical structure and the - of polyvinylchloride. A review 3, 535
Thermal stability, influence of unit type inhomogeneity of the - of polyimides 7, 1732
Thermal stability of methyl methacrylate copolymers with some dimethacrylates 11, 2650
Thermal stability, on the influence of the chemical structure of polymers on their - 9, 2194
Thermal stability, relationship between the chemical structure and - of emulsion PVC 5, 1204

Thermal transformation, aspects of the - of graft ethylene-propylene–polyacrylonitrile (SKEP–PAN) copolymers 4, 814
Thermodynamic parameters, investigation of the structure and - of interaction of components in plasticized cellulose nitrate 6, 1452
Thermodynamics of high-elastic deformation of filled polyvinylchloride 1, 181
Thermofluctuation rupture of stressed bonds on dissolution of polyethylene 10, 2366
Thermogravimetry, study of thermal degradation of poly-bis-maleimidamines by - 5, 1266
Thermoinitiated paramagnetism, influence of gases on the ESR spectra and on the - of polyacrylonitrile semiconductors 2, 425
Thermoluminescence, study of molecular motion in chloroprene rubber by nuclear quadrupole resonance, - and dynamic mechanical analysis using a torsion pendulum 8, 1985
Thermomechanical properties of ethylene-propylene copolymer–acrylonitrile (EPR–PAN) graft copolymers containing a polycojugated system 4, 941
Thermo-oxidative ageing, an IR-spectroscopic study of the - of certain butadiene–styrene copolymers 4, 807
Thermooxidative degradation, influence of stabilizers of - of poly-4-methyl-1-pentene on its viscoelastic properties 6, 1413
Thermooxidative degradation, kinetics and mechanism of the - of polyisoprene rubber 2, 419
Thermostimulated depolarization, recording relaxation transitions in polymers by the simultaneous measurement of radiothermoluminescence and the current of - 1, 255
Thiacyclanes, the mechanism of the stabilizing effect of - 3, 601
Thromboresistance, preliminary evaluation of the - of polymer materials 8, 2043
"Tie chains", simulation of the effect of continuous - on mobility in partially crystalline polymers 1, 218
"Tie chains", simulation of the role of continuous - in partially crystalline polymers 1, 210
Titanium catalytic systems, kinetic parameters for the polymerization of butadiene by certain - 1, 57
Titanium cyclopentadienyl complexes, activation routes of ethylene polymerization by homogeneous catalysts based on - 9, 2162
Toluene, diffusion of benzene, - and styrene in polyvinylchloride films 8, 2006
Torsion pendulum, study of molecular motion in chloroprene rubber by nuclear quadrupole resonance, radiothermoluminescence and dynamic mechanical analysis using a - 8, 1985
Transformations, balance of chemical and physico-chemical - in solutions of polyamic acids on storage 6, 1406
Transformations, low temperature - of polyarylates containing carborane 10, 2555
Transformations of oxypropylmethyl cellulose in suspension polymerization of vinyl chloride 4, 997
Transition metal halides, study of complex-formation between polyethylene glycols and - 1, 238
Triacetylcellulose, role of physical impairment of a polymeric medium during chemicomechanical degradation of - 2, 431
Triaminobenzenes, synthesis and study of polymers based on tetranitriles of tetracarboxylic acids, - and bis-(*o*-cyanamines) 5, 1248
Triazolinediones, modification of diene polymers and polymer synthesis by reaction of - with olefinic bonds 11, 2587

Triblock copolymers, structure formation in macromolecules of - 12, 2893
Trimethylsilanol, study of polymerization of hexamethylcyclotrisiloxane in the presence of - 3, 733
2,4,7-Trinitrofluorenone, optical generation of charge carriers in polytolane and its complexes with - 1, 232
Turbidity of the system, determining melting points of polymer crystallosolvates by measuring the - 8, 2048

Unsaturated oligo-imides, copolymers synthesized from vinyl monomers and - of carding diamines 5, 1138
Urea groups, features of self-association of - in polyester urethane ureas 10, 2446
UV light, photo-oxidation of aliphatic polyamides by the action of long-wave - 12, 3000

Vibrational amplitudes, on the characteristic nature of - of interatomic distances 2, 386
Vinyl acetate, thermal degradation of copolymers of vinyl chloride with - 7, 1675
Vinylacetylene alcohols, study of the structure and properties of polymers of - 12, 2986
Vinyl chloride, interaction of homo- and copolymers of - and acrylic esters with ozone 7, 1708
Vinyl chloride, secondary structuring during the polymerization of - 9, 2121
Vinyl chloride, special aspects of the thermal degradation of copolymers of - with methyl acrylate 7, 1809
Vinyl chloride, thermal degradation of copolymers of - with vinyl acetate 7, 1675
Vinyl chloride, transformations of oxypropylmethyl cellulose in suspension polymerization of - 4, 997
Vinyl monomers, chain transfer during the low-temperatur epolymerization of - at the glass transition of an alcoholic matrix 5, 1210
Vinyl monomers, copolymerization of N-vinylsuccinimide with - in dimethyl sulphoxide 12, 2860
Vinyl monomers, copolymers synthesized from - and unsaturated oligo-imides of carding diamines 5, 1138
Vinylidene fluoride, analysis of the ^{19}F NMR spectra of copolymers of - with tetrafluoroethylene, and of vinylidene fluoride with tetrafluoroethylene and hexafluoropropylene. The use of an empirical additive scheme and of the principle of alternation 3, 711
Vinylphenyl ether, kinetic study of the mechanism of alternating copolymerization of maleic anhydride with - 2, 455
Vinylphosphonic acid, determining the amount of crosslinking agent – N,N'-methylenediacrylamide in crosslinked copolymers of diethyl ester of - with acrylic acid 10, 2580
4-Vinylpyridine, radiation graft copolymerization of a binary mixture of - and diethylaminoethylmethacrylate 4, 832
Vinyl pyridines, the electronic structures of complexes of - with metal halides and their crosslinking capability 8, 1853
Vinylpyridinium salts, features of radical polymerization in alcohols of -, varying the hydrophylic/probic balance 4, 947
Vinysilanes, investigation of the influence of ionizing irradiation on the structure of copolymers of ethylene with - 1, 114
N-Vinylsuccinimide, copolymerization of - with vinyl monomers in dimethyl sulphoxide 12, 2860

Vinyl sulphonate, the phase equilibrium and rheological properties of solutions of the copolymer of acrylonitrile with methyl methacrylate and - in binary solvents 8, 1977
Vinylthio groups, quantitative determination of the - in divinyl sulphide copolymers by IR and UV spectroscopy 7, 1845
Visco-elastic characteristics, a dynamic method for determining - of polymeric materials 11, 2839
Viscoelastic properties, influence of stabilizers of thermooxidative degradation of poly-4-methyl-1-pentene on its - 6, 1413
Viscometry, molecular characteristics of highly-substituted cellulose nitrate in solutions from forward diffusion, flow birefringence and - 11, 2661
Viscosity of solutions of incompatible polymer mixtures 4, 934
Viscosity properties, on the - of chitosan solutions 3, 665

Water-soluble complexes, study of the structure of - of bovine serum albumin with poly-4-vinyl-N-ethylpyridinium bromide by light scattering 6, 1512
Water vapour, the diffusion of - in linear polyurethane 4, 822

X-ray diffraction, comparison of light-scattering with - data on spherulite deformation in polyethylene films 10, 2431
X-ray structural analysis, machine calculations for polyaryleneimide chain conformations and packing in the crystalline zones; the combination of the atom–atom potentials method with - 10, 2404
X-ray structural analysis of non-metallic phthalocyanides 6, 1319
X-ray study of polymeric liquid crystals based on *p*-hydroxy-*p'*-n-amyloxyazobenzene 7, 1692

Ziegler catalysts, ^{13}C NMR study of the molecular structure of ethylene–propylene copolymers synthesized on supported - 5, 1197
Ziegler catalysts, on enhancing the reactivity of supported - in elementary steps of ethylene polymerization with inert supports modified by a magnesium compound 6, 1458
Ziegler catalysts, polydispersity of ethylene–propylene copolymers synthesized on supported - 7, 1724
